Munich, 8. June 2026

Profile of Mr. Markus Hopf Dipl.-Ing. (FH)

Picture:

Overview:

- Dipl.-Ing. Computer Engineering (FH)
- Certified Professional Scrum Master PSM
- Certified Spring Professional
- Sun Certified Java Programmer
- Sun Enterprise Trainer
- Sun Certified Enterprise Architect
- OMG Certified UML Professional
- IBM Certified XML Professional

Skills:

- Senior Full Stack Developer
- Cloud Microservice architecture
- Single Page Applications (SPA)
- Jakarta EE, Java, JavaScript, Typescript, Groovy, Kotlin, Scala, Go, Python
- Angular, ReactJs, Wicket, JavaFx
- Spring Boot, Hibernate
- Kafka, NodeJs, npm
- Kubernetes, Docker
- REST API Webservices
- Coordination of Projects

Availability: From **1.7.2026** 100%

Location: **Munich** or Remote.

Conditions: **x,- €** per hour.

Experience: about 30 years

Birthday: 13.02.68

Address: Dipl. Ing. (FH) Hopf, Markus
Klara-Ziegler-Bogen 53, D-81739 München
Mobil: +49 172 / 95 94 590
E-Mail: info@hopf-it.de
Homepage: www.hopf-it.de

Past projects:

HMI

Role: Senior Full Stack Developer
Branche: Software
References: Co. Tagueri in Ditzingen/Remote
Contact person Mr. Russel Krusenbaum
https://www.tagueri.com

From	03/2026	-	now	with	x months

REST server JSON encoding based on Java with Spring Boot
Typescript with Angular Web UI
Docker container image as build artifact
Nexus dependencies and target for build artifacts
Creating and optimizing build and CI/CD pipelines
Jenkins Multi-Branch Pipeline
Unit and integration testing with JUnit
Performance testing and monitoring
Ensuring code quality through SonarQube analysis
Optimizing software architecture and deployment processes
PKI Key Generation
Java 21 Spring Boot Applications
JHipster with JDL Schema Files
Ansible for Process Automation
SOAP Interface for data exchange
Message signature with Openssl
Zertificates and PKCS12-Files
Liquibase Database Migrations
Podman Container and Image Management
LDAP Access over Keycloak
Postgres as relational Datenbase
Sonar Quality Checks
E2E Integration Tests
Key Management for Device Communication
Role-based Access Control - RBAC
Provider for critical Infrastructures
Management of Security Modules
Multi-Factor Authentification (MFA)
Crypto know-how
Key distribution and PKI

Device navigation
Requirements analysis
Agile development of software projects
Creation of concepts and requirements
Functional software testing
Reducing test and development cycles
Requirements management, capturing requirements

Realized with:	Operatingsystems	Unix, Linux, Windows
	Datenbases	PostgreSQL, MariaDB
	Developmenttools	IntelliJ, Visual Studio Code
	Tools	Angular, @angular/material, bootstrap, eslint, TypeScript, webpack, router, SOAP, JHipster, Ansible, Python, pip, SSH Keys, Openssl, PKCS12, keytool, junit, Java, JakartaEE, JavaScript, podman, Docker, Keycloak, FreeIPA, OpenLDAP, Kerberos, Postgres, Spring Boot, Znuny, IAM, MFA, RedHat, RHEL, Linux, Windows, JIRA, Bitbucket, Exceed TurboX, Jenkins, Sonar, Sonarqube, jacoco, Confluence, checkstyle, archunit, prometheus, JWT, Websockets, Grafana, Logstash, Graylog, checkmk, SNMP, Nexus, gradle, groovy, kotlin, fasterxml, github, vaadin, apache commons, commons, netty, swagger, undertow, jakarta, joda-time, bouncycastle, Intellij, jetbrains, eclipse, hibernate, hamcrest, mapstruct, mockito, seleniumhq, slf4j, springframework, wsdl, nodejs, node, npm, Liquibase, REST, JSON, JavaScript, Git, Gitlab, CI/CD, Spring Actuator, Java 21 Streams API, Spring Data, freeIPA, LDAP, LLM, Copilot, Claude, ChatGPT, Polarion

Crypto Key Distribution

Role: Senior Full Stack Developer
Branche: Software
References: Co. Akkodis in Stuttgart/Remote

Bank Migration - Atruvia

Role: Technical Project Management
Branche: Bank
References: Co. Zühlke AG in London/Remote
Contact person Mr. Kris Hubert, Mr. Tommaso Solcia
https://www.amass-technology.com
https://www.zuehlke.com

From	10/2024	-	02/2025	with	5 months

Clarification of minimum requirements
Relocation of servers to a data center
Data center commissioning
Project Management Coordination Tasks
Migrationproject
IT-Architectur
Meeting Planung
Project Timeplan
Covering all Customer Requests
Review Documentation
Evaluation of Test Results
Suggestions for Improvements and Enhancements
Internal Coordination
Providing continuous Updates

Report Projectstatus
Data Transfer and Integration
Credit Bank Migration for Peridot
Peridot Customer Migration to Atrivua

Realized with:	Operatingsystems	Windows, Linux
	Datenbases	H2, Oracle
	Developmenttools	Eclipse, IntelliJ, Visual Studio Code
	Tools	maven, IBM

Mission Control Panel - FELIS

Role: Senior Full Stack Developer
Branche: Public Sector, Police
References: Co. T-Systems in Berlin/Remote
Contact person Mr. Tim Zett, Mr. Benjamin Zeiss, Mr. Frederic Mehl

from	04/2023	-	09/2024	with	18 months

Asynchronous Microservices Landscape
30 Microservices for Front- and Backend
Reactive, resilient and scalable Applications
Consequent Usage of Reactive Programming Paradigms
RxJava Reactive Extensions for the JVM
Redux Frontend Component Store with NgRx
NgRx Components
Callbacks, Promises, Futures and Kotlin Coroutins
Event Bus with Non-Blocking Verticals
Asynchronous Event Loop
WebSockets Server-sent Events
Usage of Fluent API
Event Sourcing Pattern
CQRS and Saga Pattern
Eclipse Vert.x Toolkit
Kendo and Angular Material Design UI Components
RESTful URL Design
Vert.x-Web for RESTful HTTP Microservices
AMQP Messaging with Apache Kafka
Migration of Vert.x to Kafka
Distributed Clustering
Asynchronous Data and Event Streams
Implementing Back-Pressure Streams

Virtualised Environments and Containers
Docker and podman Containerization
One Time Password - Multi-Factor Authentification
JWT/OAuth2 based Authorization
CORS - Cross Origin Resource Sharing
CSRF - Cross Site Request Forgery
Zookeeper Cluster Manager
Monorepo Usage with Nx
Keycloak IAM Rolles and Rights
Cloud Virtualization-Plattform VMware vSphere
DevOps Gitlab Pipline
API-Gateway
Python and Robot for Data migration
AWS S3 File Storage
Development of a 110 Control-Panel for the Police
Disposition of Missions
Policeman Management
Tracing Management
Mission Protocol and Management
Location-based Map with Vectordata
Creation of Requirements and Concepts
Creation of Administration Guides
Team Lead

Realized with:	Operatingsystems	AWS, Windows, Linux
	Datenbases	H2, MariaDB, MsSql, MongoDB, PostgreSQL

	Developmenttools Tools	Eclipse, IntelliJ, Visual Studio Code, Jakarta EE, Powershell, maven, gradle, ant, Infinispan, Hazelcast, Vert.x4, Verticle, SLFj4, jackson, netty, logback, assertj, TCP/IP, Http, JUnit5, VisualVM, jMeter, RxJava, RxJS, ReactiveX, JavaScript, REST Assured, Docker Compose, Minikube, Apache Kafka, Apache FreeMarker, Thymeleaf, Pebble, Rocker, X-XSRF-TOKEN, AJAX, XSS, Consul, Kubernetes, Skaffold, podman, Redis, GraphQL, Failsafe, surefire-plugin, Circuit Breaker, Node.js, SockJS, Prometheus, Micrometer, Grafana, ZooKeeper, Ansible, helm, Terraform, GraphHopper, Gitlab, Node18, Java20, Kendo, Angular Material Design, Angular16, Angular Nx, Jest, Karma, Reducer, Robot Framework, Taurus, Hibernate, DozerMapper, Sonar, SOAP, Liquibase, VMware vSphere, Keycloak, IAM, JWT, OpenID Connect /OAuth2, Websockets, nrwl/nx, nx.dev, Cypress, TypeScript, JavaScript, Html, Css, Atlassian, Jira, Confluence, Bamboo, draw.io, Fileon and ColorZilla

Online Banking - Customer Focus

Role: Senior Full Stack Developer
Branche: Bank
References: Co. Atruvia/attempto in München
http://www.atruvia.com

from	02/2022	-	03/2023	with	14 months

Service Cut Design
Conception, Consulting and Maintain
Implementation in all Layers
Architecture Diagrams with ADOIT and ArchiMate
Java Spring Boot Microservices
Angular Single Page Application (SPA)
10 Microservices for Front- and Backend
TypeScript, Java, JavaScript, Groovy
RESTful Microservice Architecture
REST API Versioning
Red Hat Open Shift Cloud Environment
Docker Container into Kubernetes Cloud Environment
Jenkins CI/CD-Pipelines
Infrastruktur as Code (IaC)
JSON Web Token (JWT), Bearer- Authorization-Header

Usage of the Omnikanalplattform OKP
Implementation of Java Banking Framework JBF
Kubernetes Commands and Configuration
Quality Tasks with Sonar and Linting
Multi Maven Projects
Nexus Artifact Repository
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Redis In Memory Cache
Host Connection and COBOL Copybook Integration
Testautomation, Performance Analysis, Resilience
Cypress and Karma Tests
Sleuth, Zipkin, Opentracing, Dynatrace
Grafana and Dynatrace Monitoring
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
NGINX Configuration
Soap Communication Protocol
Kubernetes Secrets Configuration
Semantic Versioning
DevOps with CI/CD Jenkins Pipelines
Unix Shell Scripts with bash
Web Performance Analysis Tools
Data Exchange with WSDL and SOAP
Creation and Maintainance of Helm Charts
JMeter Heavyweight Tests
Development Parts for Online Banking Platform
Browser and Mobil based Banking as Single Page Application (SPA)
Creation of Concepts
Creation of Administration Guides
Reviews of Sourcecode
Support of Developers
Coordination Dev and DevOps Tasks
Remote Communication over MS-Teams
Agile Development in Scrum Team and SAFe
Grooming, Planning, Retrospective, GIP
Communication in English and German
OnlineBanking and VR Banking App

Realized with:	Operatingsystems	Red Hat Open Shift, Windows, Linux
	Datenbases	H2, Oracle

Developmenttools Tools	Eclipse, STS, IntelliJ, Visual Studio Code Powershell, ADOIT, ArchiMate, LeanIX, Mapstruct, Hazlecast, Java 17, JUnit 5, Jupiter, Lighthouse, web.dev, requestmap.webperf.tools, webpack-bundle-analyzer, WebP, Angular 15, Postman, newman, Swagger, Git, Bitbucket, Jenkins, OTC, helm, Red Hat OpenShift, AWS, Kubernetes, NGINX, Ingress, JMeter, Kafka, Teams, TypeScript, Groovy, JavaScript, Jasmine, Cypress, Mocha, Chai, Karma, Gherkin, cucumber, mural, xrepository, Sleuth, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Docker, JPA, Hibernate Envers, LogBack, Log4j2, JWT, Maven, Nexus, Sonar, Lint, Hystrix, H2, Oracle, MsSQL, PostGre, Liquibase, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, Kubectl, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, Nx, ngxs/store, @ngrx/component-store,, IBM RecordClassGenerator, Redis, Grafana, Prometheus, Istio, kibana, Confluence, JIRA, OpenAPI, ReadyAPI, planitpoker, electron, conceptboard.com, miro, wiremock, lucidchart, arc42, Sketch MeaXure

Shared projects for judiciary - GeFa

Role: Technical Architect
Branche: Public Sector
References: Co. .msg in München/Ismaning
Contact person Mr. Shinja Strasser, Mr. Helmut Lämmermeier
http://www.msg.de
http://www.gefa-justiz.de

from	08/2021	- 02/2022	with	7 months

Architecture Responsibility and Service Cut
Domain based Microservices
Conception of Cross cutting themes
BSI Security-Requirements
Analysis of None-Functional-Requirements
Conception, Maintain and Consulting
Creation of Architecture Concepts
Greenfield Project
Communication with Senior Full stack Devs

Angular Single Page Application (SPA)
Browser based Court-WebApp
Approx. 30 Microservices for Front- and Backend
TypeScript, Java, JavaScript, Groovy
RESTful Microservice Architecture
REST API Versioning
Framework for Standardization of Microservices
Open Telekom Cloud Environment OTC
Docker Container into Kubernetes Cloud Environment
Jenkins CI/CD-Pipelines
JSON Web Token (JWT), Bearer- Authorization-Header
Kubernetes Commands and Configuration
Relational SQL Scripts
Database Connections and Liquibase Migrations Scripts
Hystrix latency for Fault Tolerance
CircuitBreaker, FeignClients, SoapClients
Quality Tasks with Sonar and Linting
Multi Maven Projects
Nexus Artifact Repository
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Testautomation, Performanceanalysis, Resilience
Cypress and Karma Tests
Sleuth, Zipkin, Opentracing, Dynatrace
Monitoring, Security
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles with trunk-based-development
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
Ingress Service Discovery
NGINX Configuration
Soap Communication Protocol
Kubernetes Secrets Configuration
Semantic Versioning
Angular State Management with ngxs/store, Actions and Reducer
Angular Material Design UI Components
DevOps with CI/CD Jenkins Pipelines
Shell Scripts
Web Performance Analysis Tools
Data Exchange with WSDL and SOAP
JMeter Heavyweight Tests
Operation of Certification Authority (CA) for PKI

Usage of Public-Key-Infrastructur (PKI)
Meetings with business domain experts
Development of a Court-Software for the German Justice
Browser based Court-App as Single Page Application (SPA)
Ca. 100 involved Persons in Development
Reviews of Sourcecode
Coordination of Devs and DevOps Tasks
Agile Development in a Scrum Team and SAFe
Grooming, Planning, Retrospective
Communication in English and German

Realized with:	Operatingsystems	Open Telekom Cloud (OTC) , Windows, Linux
	Datenbases	H2, Oracle, MsSQL, PostGre
	Developmenttools	Eclipse, STS, IntelliJ, Visual Studio Code
	Tools	ArchiMate, LeanIX, SPARX, Mapstruct, Hazlecast, Java 11, Lighthouse, web.dev, requestmap.webperf.tools, webpack-bundle-analyzer, WebP, Angular 13, Postman, newman, Swagger, OpenAPI, Git, Bitbucket, Jenkins, OTC, Kubernetes, NGINX, Ingress, JMeter, Teams, WebEx, Angular, TypeScript, Groovy, Java, JavaScript, Jasmine, Cypress, Mocha, Chai, Karma, Gherkin, cucumber, mural, xrepository, XJustiz, Sleuth, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Docker, JPA, Hibernate Envers, LogBack, Log4j2, JWT, Maven, Nexus, Sonar, Lint, Hystrix, H2, Oracle, MsSQL, PostGre, Liquibase, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, Kubectl, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, Nx, ngxs/store, Prometheus, Eclipse, STS, IntelliJ, kibana, Confluence, JIRA, coyo

Housing-saving Calculator and Taxes

Role: Senior Full Stack Developer
Branche: Finance
References: Co. Fiducia GAD in München/Aschheim
Contact person Mr. Matthias Leukert, Mr Erich Burggraf, Mr. Martin Hahn
http://www.fiduciagad.de

from	12/2019	- 08/2021	with	20 months

Angular Single Page Application - SPA
12 Microservices for Front- and Backend
TypeScript, Java, JavaScript, Groovy

RESTful Microservice Architectur
REST API Versioning
Framework for Standardization of Microservices
Red Hat OpenShift Cloud Environment
Red Hat Enterprise Linux (RHEL) Systemadministration
Docker Container in Azure Cloud Environment
JSON Web Token (JWT), Bearer- Authorization-Header
Kubernetes Commands and Configuration
Relationale SQL Scripts
Database connections and Flyway Migrations Scripts
Hystrix latency for Fault Tolerance
CircuitBreaker, FeignClients, SoapClients
Quality with Sonar and Linting
Multi Maven Projects, Gradle Build Scripts
Nexus Artifact Repository
AMQP Messaging - Advanced Message Queuing Protocol
Usage of the Omnikanalplattform OKP
Implementation of Java Banking Framework JBF
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Camunda Process-Engine
Camunda BPMN-Workflows and DMN-Decisions
Testautomation, Performanceanalyze, Resilienz
Selenium, Fitnesse, Protractor and Karma Tests
Zipkin, Opentracing, Dynatrace
Monitoring, Security
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles with trunk-based-development
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
Consol Service Discovery
Soap Kommunikations Protokoll
Openshipt Secrets Konfiguration
Semantic Versioning
Angular State Management with ngxs/store, Actions and Reducer
Angular Material Design UI Components
Migration towards Angular 11
JQ Json Parser
DevOps with OpenShift CI/CD Jenkins Pipelines
Shell Scripts
Web Perfomance Analyse Tools
Data exchange with WSDL and SOAP

JMeter Robustness Tests
Developing of a Housing-saving Calculator
Enhancement of the Bank Desktop - BAP
All kind of taxes sheets
REST Interfaces tou BAP, KAPST and agree21
Meetings with buisness domain experts
Reviews of Sourcecode
Dev and DevOps Tasks
Remote Communication over Skype and Gotomeeting
Agile Development in a Scrum Team and SAFe
Grooming, Planning, Retrospective
OnlineBanking and VR Banking App
Communication in English and German

Realized with:	Operatingsystems	Azure Cloud, Windows, Linux, Ubuntu KDE
	Datenbases	H2, Oracle
	Developmenttools Tools	Mapstruct, Hazlecast, Java 11, miro.com, HashiCorp Consul, Lighthouse, web.dev, requestmap.webperf.tools, webpack-bundle-analyzer, WebP, Angular 11, Postman, newman, Swagger, OpenAPI, Git, Bitbucket, Jenkins, Red Hat OpenShift, Azure, Camunda, Spin, JMeter, IBM Lotus Notes, Teams, GotoMeeting, Angular, TypeScript, Groovy, Java, JavaScript, Selenium, Jasmine, Protractor, Mocha, Chai, Karma, Fitnesse, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Kubernetes, Docker, AMQP Messaging, JPA, Hibernate, Log4j2, JWT, Maven, Gradle, Nexus, Sonar, Lint, Hystrix, H2, Oracle, SQL, Flyway, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, Kubectl, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, Telegram, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, ngxs/store, allure, IKESA, VR-NetKey, aqua, Grafana, Prometheus, funretro.io, IntelliJ, consul.io, gson, kibana

Digital Marketplace - G2M

Role: Full Stack Developer
Branche: Telecommunication
References: Co. Rohde & Schwarz in München
Contact person Mr. Patrick Bauriedl, Mr. Ivan Kostov, Mr. Christ. Maurer
http://www.rohde-schwarz.com

from	09/2019	- 12/2019	with	4 months	

Development of Digital Marketplace Applications
WebShop Development with Angular and NodeJs
Backend and Frontend with TypeScript and JavaScript
Packet Manager npm and yarn
Azure Cloud based PaaS
Docker based MicroServices
Docker Compose multi-container solutions
Harbor Registry for Docker images
Git Hooks with Husky
Red Hat OpenShift Pods
OKD Jenkins Pipelines and Clusters
Administration of OpenShift Clusters
OC and Kubectl CLI commands
Yaml Templates as OpenShift Service Definition
Azure Service Bus for asynchrones Messaging
REST API Routes with Versioning
OpenAPI, Swagger Documentation
Authentification over SAML Service
NoSQL Datenbase MongoDB
Configuration as Code with Jenkinsfiles
CI/CD Pipeline
Distributed Tracing, OpenTracing
OWASP and Lizence checks
CSS Styles and Html Templates
Jasmine, Karma and Robot Tests
Test with Robot Framework and RIDE Suites
Python Scripte for Test Automation
Sonar and Checkstlye Coverage
Dev and DevOps Duties
Development of a generic Webshop
Shop Extensibility for cloud products
Go-2-Market Applications - G2M
Identity and Access Management - IAM
Remote Communication over GotoMeeting
Agile, remote Scrum Team
Grooming, Planning, Retrospective
Project language English

Realized with:	Operatingsystems	Azure Cloud, Windows, Linux, Ubuntu KDE
	Datenbases	MongoDB, CosmosDB, mySQL

	Developmenttools Tools	Red Hat OpenShift, Azure, MongoDB, Docker, Visual Studio Code, Notepad++, Citrix, Chrome DevTools, TypeScript, Angular, ReactJs, Jasmine, Karma, Robot Tests, EsLint, NodeJs, npm, yarn, PMD, Checkstyle, Sonar, JIRA, Docker, Proxyfier, Postman, Hyper-V, VMware, Skype, git, bash, zipkin, jaeger, depcheck, module-structure, retire.js, OWASP, Harbor, CosmosDB, Husky, OKD, OC, Kubernetes, Kubectl, Keycloak, MockServer, Ubuntu KDE, Kate, Dolphin, robotframework, RIDE, Python, pip, MarkdownViewer++, Markdown Extension, json, yaml, JWT, APISimulator, draw.io, Studio 3T, OpenAPI, Swagger

Siemens Corporate Entitlement Service - CES

Role: Full Stack Developer
Branche: Security
References: Co. Siemens in München
Contact person Mr. Siegfried Eichner, Mr. Binh Le Nguyen, Mr. Erik Bergjohann, Mrs. Elena Thiel
http://www.siemens.com

from	06/2018	-	09/2019	with	16 months

Implementation of Spring Microservices
Spring Boot and Spring Batch Applications
Spring Core, Security
Spring Eureka Multi Instanz Architecture
Spring Cloud Netflix, Eureka, MVC, Thymeleaf
RESTful Spring Controller
Angular Frontends development
Npm and NodeJs
Java and JavaScript
Reactive Programming with Typescript
Json and yml
Jenkins Release Pipeline with Jenkinsfile
Groovy Scripts
Java 8 Functional programming
JWT (JSON Web Token) for Microservices
Maven Multi Module Projects
DevOps Tasks
Cloud Foundry
Artifactory Repository
Git and svn Repositories
Svn to Git Migration

Introduction of Git-flow Workflow with GitLab
In-memory data grid performance optimization
XSS Cross Site Filter for Tomcat
PKI Infrastructure
Public Key, private Key communication
One Time Password - OTP
OpenID, Single Sign On - SSO
Security Assertion Markup Language - SAML
DirX and LDAP lookup
Windows Active Directory Configuration
Active Directory-Certification Service (AD CS)
Apache Load balancing
Tomcat Web Applications
Shell Script programming
Sonar for static code analyse
OWASP Security Findings
HTML5, CSS
Spikes for Kotlin and Scala
Kundenaccounts with Single Sign On
Authentication / Authorisation
Segregation Of Duties – SoD
Agile Story Planung with JIRA
Smartcard PKI Login
Secure Coding
Protection Requirements Assessment PRA
User Management
2-Factor Authentication
Process definitions
Coordination and Bug Tracking
Agile Development with Scrum and Kanban
Grooming, Planning, Retrospektive
Remote communication over Circuit
Project language Englisch
Partly remote team

Realized with:	Operatingsystems	Windows, Linux
	Database	Oracle, H2, mySQL

	Developmenttools Tools	Microsoft AD, AD CS, Visual Studio Code, Eclipse, STS, Java, Kotlin, Scala, Mockito, RxServer, Netty, Lombok, Cucumber, GitLab, YAML, Portecle, Ansible, JWT, Retire.JS, Git, svn, bash, Tomcat, Jetty, Entrust, Syncplicity, Splunk, Circuit, Subclipse, LDAP, DirX, X.509, WinSCP, puTTY, puTTYGen, Groovy, SQuirreL, eclEmma, cron jobs, Remedy, repIT, Lucidchart, Postman, ssh, ssl, Oracle, H2, Kanban, DevOps, Mailversand, Swagger, Netflix, Hystrix, Ribbon, Cobertura Code Coverage Report, cacerts, keytool, UML, ant, pageant, PMD, Checkstyle, Findbugs, Spotbugs, Sonar, Fiddler, SiMPL, Yo, npm, node, OWASP, jSoup, JIRA, conceptboard

Financeportal for public financing - PIF

Role: Full Stack Developer
Branche: Bank, Fintech
References: Co. Dt. Pfandbriefbank/Capveriant in Munich/Unterschließheim

Logistic for yard management - flow

Role: Full Stack Developer
Branche: Logistic
References: http://www.43gis.com
Co. 43gis in Munich.
Contact person Mr. Torsten Oltmanns, Mr. Clemens Weber

from	03/2017	- 10/2017	with	8 months

Microservices Architecture
ReactJs frontend development
Spring 4 and Java 8 backend development
Single Page Applikation implementation
Workflow implementation for Statemachine
Redux Datastore connection
REST communication
Ajax and Promises Callback communication
NodeJs and npm development
Websocket Endpoint Messaging
EsLint for code quality
implementation of transactional Spring components
Persistence with Hibernate
Data migration
SCM with Git and Gogs

Unit and integration tests
Jenkins Build control
JBoss, Wildfly Application Server
gradle and Maven build control
Certified Scrum Master PSM
Remote teams, Nearshoring
JIRA, confluence
Skype, TeamViewer
asterisk telefon conferences

Realized with:	Operatingsystems	Windows, Linux
	Database	Oracle
	Developmenttools Tools	NodeJs, npm, ReactJS, JavaScript, Mocha, ES6, JSX, Redux, PhantomJS, Jest, enzyme, sinon, Lerna, karma, Lanterna, EsLint, Java 8, Spring Core, Spring Data, JPA, Hibernate, Mockito, JMX, Git Bash, Gogs (Go Git Service), Jenkins, TeamViewer, REST, Json, Postman, SQLDeveloper, ORACLE, MSSQLServer, iBatis+Liquibase DB Migration, Eclipse Neon, JBoss, Wildfly, Gradle, Maven, artifactory, Visual Studio Code Editor, sublime, Atom, Notepad++, JSP, JQuery, HTML, CSS, OpenLayers, jacoco, Skype, Confluence, JIRA, Jing, Nagios, Bizagi Modeler, Bamboo Paper, XMind Mindmaper, realtimeboard, linoit, Scrum

Vehicle calculator for classic cars - ANDIE

Role: Full Stack Developer
Branche: Insurance

from	10/2016	- 03/2017	with	6 months

Angular frontend development
Spring backend development
Development with Java 8 language features
REST call interface with Promises and Observables
Asynchron client/server communication with callbacks
Cross-Origin Resource Sharing (CORS) implementation with Spring
Protection against Cross Side Scripting (CSRF) with Spring
Grunt and Maven as Build Tool
Project modularization in Node.js, npm submodule
JSON and YAML file formats
Usage of HTML5 and CSS

Protractor E2E Tests
Jasmine Test Framework
Selenium Web Driver Tests with PhantomJS
Oracle VirtualBox for Vagrant virtualization
Migration with Postgre datenbase scripts
Complete new development in small team
Tariff calculation of car insurances for end customers
Customer registration with Double-Opt-in
Automated E-Mail delivery
Confluence Jira for communication
Process model with Scrum Team
Communication with Test Team

Realized with:	Operatingsystems	Windows, Linux
	Database	PostgreSQL
	Developmenttools Tools	Flyway, Mockito, EasyMock, TSLint, Balsamiq, Hibernate, Node.js, npm, Firebug, VS Code, CSS, HTML5, SonarLint, Spring Data, Spring Core, Spring Boot, GitHub, Angular2, Apache Commons, Docker, Vagrant, Jing, JIRA, Confluence, Json, YAML, SoapUI, Log4j, git, mvn, SourceTree Git Browser, Nexus, Jenkins, REST, JPA, DBeaver, PostgreSQL, Eclipse, STS, Java 8, putty, WinSCP, Notepad++, subethasmtp

Telephone Number Porting with Java EE

Role: Backend Developer
Branche: Telecommunication
References: http://www.consol.de
Co. ConSol in Munich.
Contact person Mr. Thomas Michal, Mr Andreas Berger.

from 04/2016 - 10/2016 with 7 months

EJB backend development
Webservice REST Client/Server communication
Angular2 web development with TypeScript
TypeScript as abstraktion for JavaScript
Migration von EJB 2.1 nach EJB 3.0
Spring data for JPA repository access
TestNG components tests
Oracle WebLogic Application Server
Oracle PL/SQL Stored Procedures
RMI - Remote Method Invocation
Workflow engine

MSISDN migration over staging tables
JavaScript development
Node.js and npm for packages and modules management
JPA entity development with EclipseLink
Java 8 language features
Jenkins continues integration job administration
Citrus integrations tests
Maven multi project profile
Data migration of mass data
x.400 gateway and 2MRDB porting
CORBA Tuxedo connector
CORBA IDL
Scrum Master tasks
Telephone number porting
Import and export of telephone numbers for prepaid- and postpaid brands
Starter Pack SIM migration
Git branching strategies and pull requests
Atlassian tool suite for communication
Confluence Jira for processes
Bugtracking over ClearQuest
Load-tests
Realization within a scrum team
Coordination with domain experts
Communication with test-team

Realized with:	Operatingsystems	Windows, Linux
	Database	Oracle 11
	Developmenttools	Eclipse, IntelliJ
	Tools	Flyway, MyBatis Migration, Mockito, EasyMock, Hibernate, maven-replacer-plugin, Node.js, npm, Broccoli Plugin, TypeScript Eclipse Plugin, Firebug, VS Code, SonarLint, TestNG, Spring Data, Atlassian Suite, Bitbucket, Confluence, JIRA, HipChat, ClearQuest, ClearQuest, GitHub, AngularJS, Apache Commons, Docker, Jing, JIRA, Confluence, Json, Log4j, Citrus, git, mvn, ant, Nexus, Jenkins, Oracle WebLogic, SoapUI, REST, JPA, SQLDeveloper, ORACLE, Eclipse, Java 8, putty, WinSCP, Notepad++

Multiple Assembly Planning & Process System - MAPP

Role: Backend Developer
Branche: Automotive

References: http://www.gigatronik.de
Co. Gigatronik in Munich.
Contact person Mr. Stefan Hanel, Mr. Michael Voitenleitner.

from	09/2015 - 03/2016	with	7 months

EJB development
Webservice REST Client/Server communication
JPA entity development with EclipseLink
JPA criteria API
Java 8 language features like Lambdas
Aspect oriented interceptors
DB modeling
Jenkins continues integration job administration
JUnit Mockito tests and integrationtests
Maven multi project profile
Usage of JRebel
JSON data exchange format
Data migration
JavaFx client development
JavaFx design with scene builder
Glassfish configuration
LDAP connection
SONAR metrics
FitNesse tests
Generic realization of MAPP for car production and planning of BMW vehicles
Part project coordination
Coordination with domain experts
Communication with Test-Team
Organization development meetings
'Clean Code' principles
Implementation and technical realization
Senior developer
Scrum Master tasks

Realized with:		
	Operatingsystems	Windows, Linux
	Database	Oracle 11
	Developmenttools Tools	SezPoz, Apache Commons, Jing, Jersey, Json, Log4j, EclipseLink, MQ, JRebel, mockito, SVN, mvn, FitNesse, Nexus, Jenkins, Sonar, Jubula, Glassfish, REST, JPA, SQLDeveloper, ORACLE, Eclipse, JavaFx, JAutodoc, LDAP, ScenicView, SceneBuilder, Java 8

Online portal for ambulant, medical services - OPAL Web-Application

Role: Backend-, Frontend-Developer
Branche: Health Insurance
References: http://www.kvb.de
Co. KVB in Munich. Contact person Mr. Matthias Geiss.

from 09/2012 - 07/2015 _ with 35 months

- Development of the online portal OPAL
- Extension of existing service interfaces
- Spring Core for Dependency Injection CDI
- Spring Web Flow for page navigation
- Spring Restful Webservice implementation
- Spring authentication and authorization
- Browser plausibility with JavaScript
- Buildmanagement with Gradle Buildscript in Groovy
- Continues Delivery with FeatureToggles
- Dynamic configuration of features with Framework 'Togglz'
- Webservice requests with SoapUI
- Agile DB migration with flywayDB
- Programming with Java 7
- Creation of SQL Scripts
- Serverside validation with Rhino Script Engine
- XSLT transformation of data to Sciphox and EHD format
- Further development of the JSP pages
- WebTests with JUnit and Selenium Browser Plugin
- Configuration of Jenkins Jobs for CI, NB and INT environment
- Timeline versioning of business change requests
- Usage of Jenkins plugins
- Configuration of Jenkins Jobs for CI, NB and INT environment
- Usage of Gradle and Maven as build tools
- Release management with maven release plugin
- Assembling and deployment with maven
- Maintainance of data in integration
- Development of ORACLE SQL statements for ABN and Production
- Defining of SQL scripts for DB handover process
- Maintainance of data with PL/SQL scripts
- File exchange formats .json and .yml
- Asynchron processing over ONDES and KV-Connect interface
- Test Driven Development - TDD
- WebTests with JUnit and Selenium browser plugin
- Load Tests of Webservices with SoapUI
- Threading and Web Load-Tests with LoadUIWeb
- Remote access via Secure Shell (SSH) and odin
- Documentation of medical reports in the online portal (OPAL)
- Submission of electronic documentation to the KVB
- Export of data to Sciphox xml format

Support of the following medical documentations:
Allergologie, Balneophototherapie, Belastungs-EKG, Darmkrebsberatung, eDMP, DMP-Brustkrebs, Hautkrebsscreening, Koloskopie, Multiple Sklerose, Risikoprävention bei Kinderwunsch, Schmerztherapie, Sonografie Schwangerschaftsvorsorge, Tonsillotomie, Gastroskopie, Onkologie
New development of medical documentations like Hörgeräte, Molekulargenetik and Sozialpsychiatrie
Extension of the online documentation OPAL for medicians
Scrum with Daily Standup and Retrospective

Realized with:	Operatingsystems	Windows 7, Linux
	Database	Oracle 11g
	Developmenttools	J2SE 7, STS - Spring Tool Suite, Kepler Eclipse
	Tools	Java EE IDE for Web Developers, Tomcat 7, Jenkins Flow Plugins, Flyway, WinSCP, putty, Nexus, SONAR, ONDES, KV-Connect, Linux, PdfBox, Lombok, Gradle, Groovy, Spring MVC, SoapUI, Feature Togglz, Secure Shell (SSH), TLS, SSL, Burp Proxy, FoxyProxy, Hamcrest, Confluence, odin, DbSetup, flywayDB, maven release plugin, LoadUIWeb, Java 7, JavaMelody, xml-unit, JDedend, Spring Core, Spring Web Flow, Oracle SQL Developer, EJB 3.1, JPA, CriteriaAPI, SVN, Subclipe, Subversive, Tortoise, Firebug Firefox Addon, Selenium Plugin, Live HTTP headers Firefox Addon, EclEmma Eclpise Addon, CheckStyle, Maven, Tomcat, JUnit, XSLT, HttpUnit, DbUnit, Jenkins, joda-time.jar, jQuery, JavaScript Rhino Engine, JavaScript

Web Wiki/Community Angeln.de (Fishing website)

Role: Backend-, Frontend-Developer
Branche: Softwarehouse, Startup Company, Printmedia
References: http://www.angeln.de
http://www.woont.com
Co. Woont in Munich. Contact person Mr. Dirk Wermuth.

from	10/2011	-	08/2012	with	11 months

Complete relaunch in a small team
Development of a Social-, Community-, Shop- Web-Application
Implementation of various Web-Applications around www.angeln.de
Web-Frontend, Shop, Editor and Admin realized as Web-Apps
Integration of social networking pages, linkage to other Web-Apps of the domain
Data import with SQL scripts and java importer

- Development with Glassfish, Embedded Glassfish and Embedded Jetty
- Creation of generic, reusage of Ajax Wicket components
- Extensive development of Ajax components for Web 2.0
- Searching and sorting of datatables with Ajax
- Usage of tables with paging navigator and ListView
- Programming of image galleries with DataViews
- Dynamic menus with changing contexts
- Working with Wicket IModel variations like PropertyModel and CompoundPropertyModel
- Layers Design Pattern - Design and call of interfaces to the backend
- Implemention of SEO (Search Engine Optimization) techniques
- Localized URL generation in various languages
- Persistance layer with EJB, JPA and Criteria API
- Geolocating of addresses with EJB Timer Bean
- Google Maps integration with JavaScript Google API
- Bean validation over various layers using JSR 303
- Maintainance of the persistence service
- Schema maintainance and enhancements for the database
- Implementation of image and logo uploads
- Cropping and converting of images with ImageMagick API
- Image converting using im4java API for various web formats
- Usage of Maven Multi Modules with personalized profiles
- CSS adjustments and CSS generation using less compiler
- Bug tracking system OTRS
- Continues integration and nightly build using Jenkins
- Spring Dependency Injection Integration DI
- CSS and JavaScript development and debugging with Firebug plugin for Firefox
- Usage of EclEmma coverage eclipse plugin
- Generic programming using java generics
- Consequent usage of JUnit regressions tests, standard technologies and standard tools for development

Realized with:	Operatingsystems	Windows 7, Linux, Ubuntu
	Database	PostgreSQL 9

Developmenttools	J2SE 6, Eclipse 3.6.2 Helios, Glassfish
Tools	Embedded, Glassfish 3.1.1, Embedded Jetty EJB 3.1, JPA, CriteriaAPI, Apache Wicket 1.5, Eclipse, SVN, Subclipe, Subversive, Firebug Firefox Addon, Live HTTP headers Firefox Addon, PrefBar Firefox Addon, AnyEdit Eclpise Addon, EclEmma Eclpise Addon, Maven, glassfish, Tomcat, Jetty, JUnit, Selenium, Jenkins, PMD, FindBugs, joda-time.jar, guava.jar, Skype, SQuireL SQL, PostgreSQL DB, gforge, tickspot, MindMap Freeplane, im4java, ImageMagick, GraphicsMagick, jQuery, less, JCrop, OTRS, Facebook, Twitter, YouTube, Google Maps API, fancyBox

JEE Tariff Calculator and Webservice

Role: Backend-, Frontend-Developer
Branche: Insurance
References: http://www.lv1871.de
Co. LV1871 in Munich. Contact person Mr. Alexander Gold.

from 07/2009 - 07/2011 with 25 months

Relaunch/Development of the existing Tariff Calculator software with Apache Wicket Framework
Development/Maintainance of the existing Tariff Calculator software with Apache Struts
Components with usage of Wicket HTML markup inheritage development
Development of advanced Gui functionality beyond the Wicket Extensions (like "close button" on tabulators)
Wicket Ajax component development
Development of company web based components
CSS and JavaScript development and diagnosis with Firebug Plugin for Firefox
Generating of path notation with ‘bindgen’ utility and @Bindable annotation for type save Wicket ID's
Extension handler for XStream and Castor marshallers for object to XML generators
Implementation of the BiPRO insurance webservice standard
Schema validation and WSDL generation
Design of complex element inheritance in XSD schemas
Usage of JAX-WS webservice framework
JAXB XML marshalling resp. XML serialization to java
Generic programing because of java generics usage
Loadtests with SoapUI against the webservice implementation
Design of the technical and logical validation of the webservice
Development of various XML namespaces
Implementation of various insurance tariffs

Extensions on the existing tariff software
Maintainance of the productive platform
PDF generation with Apache FOP
XSL transformation in several steps up till to printable XSL-FO documents
Strict validation of XSL templates and XSL-FO elements
Integration of the printable XSL-FO documents into the webapplication
Refactoring of the exception handling
Maintainance of the intranet and Wiki
Consistent Usage of JUnit regression tests, standard technologies and standard tools for development
Spring integration
Usage of Core Spring for better Testing
Usage of various JEE / J2EE Pattern like SessionFacade, ServiceLayer, Transfer Object Assembler, DTO, DAO, ...
COBOL *.cpy integration, calls to tariff calculator cores
Automated XML printjobs
Implementation of 'lucene' search engine functionality
Usage of EclEmma Coverage Eclipse Plugin

Realized with:	Operatingsystems	Windows 7, Windows Vista, Windows XP, Linux, AIX
	Database	HDB, DB2
	Developmenttools Tools	J2SE 6.0, Eclipse 3.x, Jetty6, Tomcat6, Live HTTP headers, Firebug, Citrix, STS, Subversion SVN, CVS, WinSCP, PuTTY, Extreme Planner, Firefox, Opera, Safari, Windows 7, Windows Vista, Windows XP, commons beanutils, xalan Parser, xerces Parser, JUnit, httpUnit, Spring, Bindgen, ant, maven, Jenkins/Hudson Nightly Build Tool, Emma Test Coverage Frameworks, JAX-WS Webservice Framework, SoapUI, UML Enterprise Architect, XMLSyp, Notepad++, Bouncy Castle Cryptography Library, JDom, xstream serialize XML, Apache Struts, Apache Wicket, Apache log4j, Apache FOP, BiPRO, JAXB, WSDSL2Java, cygwin

Smartphone Web and App Development

Role: Backend-, Frontend-Developer
Branche: Entertainment
References: http://www.androidzoom.com/android_applications/trivial+dice/by_matching
http://www.m.hopf-it.de

from	09/2010	-	10/2010	with	1 month

Web app Development for Smartphones

Usage of iui - User Interface (UI) Framework from Google
Development of the own homepage in mobile format
Development of a Simple dice which rolls in 2D graphic, if you tap the screen
Game development: Trivial Dice
Conception of the layout
Design of the graphic
Development of the statemachine
External event handling
Consideration of different resolutions
Testing of various devices with emulator
JUnitTest suite for the App
Lite version with reduced feature set
Pro version with different access rights
Playing of audio file
Familiarization with the Anroid SDK and Google iui, JQTouch Framework
Multi lingual description
Versioning in Android Market

Realized with:	Operatingsystems	Windows 7
	Database	-
	Developmenttools Tools	J2SE 6.0, Eclipse 3.x, Google iui Framework, JQTouch Framework, Android SDK, Eclipse Plugin, JUnit

JEE Webapplications for Ring Back Tones

Role: Backend-Developer
Branche: Telecom
References: http://www.ect-telecoms.de
Co. ect-telecoms in Munich. Contact person Mr. Robert Parkes, Mr. Hans Huber, Mr. Ahmed Ferdous.

from 09/2008 - 06/2009 with 10 months

Creation of web applications with Tomcat, JSP, Spring and Hibernate
HTTP Authentication with Basic and Spring XwsSecurity method
Porting respectively migrating the integration layers from Oracle to HSQL database
Porting of Oracle schemas and data to HSQL database
Realization of a standalone reference web client as a presentation application
Implementation of a Soap Services with JAXB to upload binary content
Configuration of ant scripts and make them runable under LINUX and Windows
Extension of the Soap core component with new features
Publishing the new features as web service
Porting the Codehouse XFire web service architecture to Spring WS respectively Apache CXF Framework
Mobile Communication over USSD Service Codes and XML-RPC.
MDA UML transformation to XSD

XSD schema definition for automatic generation of the model and soap classes
JAXB XML marshalling respectively XML Serialization to Java
Basic Apache webserver configuration
Remote installation and deployment onto customer servers
Creation of Spring, maven and ant configurations
Error tracking with Jira as bug tracking system
Initialization and introduction of Apache Continuum as Nightly Build process, JUnit Tests, Nightly Build, SVN Tags and Branches, measure of test coverage, Intranet Wiki.
Load tests for Soap web services with soapUI
jUnit regression tests
Consequent usage of JUnit regression tests, standard technologies and standard tools in the development
Team communication and documentation completely in English

Realized with:	Operatingsystems	Windows; Linux
	Database	Oracle, HSQL
	Developmenttools	J2SE 5.0, GIMP PictureEditor, ColorZilla
	Tools	Colorpicker, FireFTP, Notepad++, Cygwin, HSQL, ORACLE10g, Eclipse 3.4, Tomcat5.5, Live HTTP headers, SQuirreL DBViewer, SQLDevelper, SQLPlus, DbVisualizer, VNC, 7-Zip, Tortoise, Subversion SVN, WinSCP, PuTTY, Jira Bugtracking, Clearspace, Thunderbird, Firefox, Ace WINScreen, Windows XP, Linux Ubunto, Spring, Hibernate, ehcache, OSGi, commons, myfaces, xalan, xerces, JUnit, httpUnit, ant, maven, Codehouse XFire, Apache CXF, XML-RPC, redstone XML-RPC library, GSM Services, EMF (Eclipse Modelling Framework), GMF (Graphical Modelling Framework), SOAP, Spring WebService, jstl, acegi security, JavaScript, JavaScript Debugger Venkman, clover and emma test coverage Frameworks, Apache CXF Webservice framework, soapUI, UML Enterprise Architect, StarUML

J2EE accounting system for health insurance (nPROD)

Role: Developer
Branche: Health Insurance
References: http://www.azh.de
Co. VSA/azh in Munich. Contact person Mr. Weber, Mr. Herrmann.

from	04/2006	-	08/2008	with	28 months

New product development of an automatic accounting system for health- and auxiliary material
Analysis and design with UML 2.1
Requirement analysis and review with buisness and domain experts
Use Case description with the CASE Tool MagicDraw
MDA usage for the persistance layer
Usage of a persistence framework (Marvin) for the modelling of the DB
Modelling of GUI workflows with the CASE Tool MagicDraw
Usage of a GUI workflow framework
SWING masks with GidBagLayout
Extensive usage of CVS (Tagging, Branching, Merging)
Rule based approach for frequently changing requirements
Migration of the project to the Spring application framework
Migration of the existing data to the new structure using CSV files
Adaptation of the data structures for the data import
Data import from ABDA pharmacy position data
Electronic data exchange (DTA) with health insurance company
JUnit-Tests for the buisness logic and the GUI
Quality ensured with 80% JUnit test coverage and CheckStyle coding conventions
Maintainance and rollout
Attendance of the project from begining to the end (product version 1.0)
Incrementell approach on database changes with update scripts
Practical experience with a reference database
Automatic price calculation for diverse health insurance funds in southern germany
Tasks: master data, price calculation, prescription position management, master agreement, DTA key management.
Development of an account software nPROD for automatic recipe prosessing.
Communication with an understaffed domain department.
Quality enhancement with cupling- and dependency metrics

Realized with: Operatingsystems	Windows

	Developmenttools Tools	J2SE 5.0, Eclipse 3.3, Jbossrules, Drools Regel-Engine, RuleEngine, Castor as XML Mapper, Clover for Testcoverage, JUnit for Programtests, CheckStyle, ANTLR (ANother Tool for Language Recognition) Parser Generator, Ant, JReport Presentationtool/FOP, Marvin proprietary Persistence Framework and Spring Persistence Framework 2.0, GUI Workflow Framework, IntelliJ 4.5, Jboss 4, MagicDraw 14, DB2-Client 7.2.0, Citrix Emulator, DBVisualiser, Toad, Sqirrel, SQL Workbench, WinCVS 2.0, TortoiseCVS, Firefox, Thunderbird, Nvu (Html-Editor), cygwin Unix Emulator, PuTTY, WinSCP

J2EE WebShop

Role: Developer
Branche: eCommerce
References: http://www.publicWEBshop.com

from	12/2005	- 02/2006	with	3 months

Webapplication to run an online web shop.
Generic webshop for all kinds of businesses.
Freely configuratable with many settings and preferences.
JSF Technologie, Apache MyFaces/Tomahawk .
Axis WebService JAX-RPC interface for B2B SOAP communication.
EJB, JSP and Servlets.
Struts and tiles.
Apache Commons.
AJAX asynch. communication on the client tier.
Object persistance with Hibernate.
Struts and tiles.
Logging with Log4j.
JavaScript and cascading stylesheets (CSS).
Planning and maintaining of a MySql database.
UML analysis and design.
XML for configuration files.
Multilingual for international purpose.
HTML, XHTML and Flash as presentation technique.
Tests with Jakarta JMeter and JUnit.
Future: XSLT and XSL-FO for PDF generation.
Future: EJB/JBoss/Spring.

Realized with: Operatingsystems	Windows, Linux

	Developmenttools	Eclipse 3.1, Enterprise Architect, XMLSpy
	Tools	Enterprise Edition, JBoss, Tomcat 5.5, Struts, Ant, JUnit, Macromedia Flash and Dreamweaver, div. Eclipse Plugins, MySQL 5

Trainings and Consulting

Role: Developer
Branche: All areas
References: here are the biggest componies:
Co. SUN Micosystems in Munich. Contact person Mr. Hettmannsberger.
Co. Accenture in Munich. Contact person Mrs. Steffen.
Co. Hilf in Oberhaching/ Munich. Contact person Mr. Hilf.
Co. AS Systeme in Stuttgart. Contact person Mr. Buehler.
Co. Tria in Munich.

from	04/2004	- 11/2005	with	19 months

J2EE
EJB, JSP and Servlets.
Java , SWING.
Webapplications.
EAI integration with differant interfaces.
Message queue connetions over JMS api.
Webservices and SOAP.
JAX-RPC.
UML analysis and design.
XML and XSLT.
J2EE and GOF design pattern.
UML for embedded systems.
OOAD object oriented techinques.
XML and XSLT.
Xalan and Xerces parser event processing.
Developing of course scripts.
Englisch courses.

Realized with:	Operatingsystems	Windows, UNIX Solaris
	Developmenttools	Eclipse 3.0, NetBeans, JBuilder, Rational XDE
	Tools	and Rose 7.5, Together Controll Center, Poseidon, Enterprise Architect,, XMLSpy Enterprise Edition 2006, SUN ONE, BEA, JBOSS, Tomcat, Struts, Ant, JUnit, XDoclet, div. Eclipse Plugins, JAD Decompiler, Obfuscation, Xalan and Xerces Parser, Pointbase, MySQL, Cloudscape

Java-COM Bridge over JNI

Role: Developer
Branche: Insurance
References: Kassenärztliche Vereinigung Bayern (KVB) in Munich.
Contact person Mr Dietl.

from	02/2004	- 03/2004	with	2 months

Refactoring and Reengeniering of an existing JNI Interface.
Java Native Interface (JNI)..
Realisation with java and C++.
Analysis and design of the existing interfaces.
Changing the interfaces from synchron to asynchron.
Design of the asynchronous communication model .
UML analysis and design.
Use of GOF design pattern .
J2EE integration of JBoss with MS Office.
JNI API for distributed objects, realised in C++.
ANSI C and C++.
Documentation.
Consulting and project leadership.
Coaching of the employees.

Realized with:	Operatingsystems	Windows XP
	Developmenttools	JNI, COM, Visual C++ 6.0, Eclipse 3.0, JBoss,
	Tools	Centro and JACOB JNI Tool

Consulting, Trainings and Courses

Role: Developer
Branche: All areas

Co. Bosch in Lohr and Hildesheim.
Co. Amatech in Germering.

from	10/2001	- 01/2004	with	27 months

J2EE
Workshops for the whole Java certification program.
Java Workshop.
Webapplications and E-Commerce architectures.
EJB, JSP and Servlets.
C#.
UML analysis and design.
XML and XSLT.

Microsoft MCSD courses.
ASP and .NET.
ANSI C and C++.
Using modern presentationtools.
Developing of course scripts.
Englisch courses.

Realized with:	Operatingsystems	Windows, UNIX
	Developmenttools	Visual Studio 6.0, Eclipse, NetBeans, JBuilder,
	Tools	Rational XDE and Rose 7.5, Together Controll Center6, .NET, SQL Server, XMLSpy, SUN ONE, BEA, JBOSS

Internet application for an billingsystem

Role: Developer
Branche: Bank, Billingsystem
References: Landeszentralbank (LZB) Bayern in Munich. Contact person Mr. Stuckmann.

from	05/2000	- 09/2001	with	17 months

Analysis and design with UML and Rational Rose.
Refactoring, Reengeneeing of UML Modells, realised with Java and C++.
Generic modelling with RUP. Generation of artifacts.
JavaBeans and serverside Enterprise JavaBeans development.
XML documents with Schema spezification.
JSP pages and Java Servlets development.
Java Script programing for all browsers.
Webapplications and Webcomponents.
JSP Engine configuration and support.
C++ Framework development with STL.
JNI API for destributet objects in C++.
Crypt with Legacy Systems from RSA and PKI.
Webserver IPlanet and IIS configuration and administration.
Complex SQL-Queries.
SWIFT SIPN and InterActBrowse connection.
SWIFT Webstation support and configuration.
Performant PL/SQL-prozedures.
Administration of ORACLE database.
Team-Software development with versioning-software Merlin.

Realized with:	Operatingsystems	Windows NT 4.0, IIS WebServer
	Developmenttools	Visual C++ 6.0, JBuilder 3.5
	JSP Engines	Apache TomCat, Allaire JRun 3.1
	Databases	ORACLE 8.x, DB2

	Emulations, Tools	Rational Rose 7.5, Telnet, FTP, SQL-ODBC-Viewer, SWIFT Webstation
	Interfaces	JNI, XML, SWIFT-SIPN

Administration and support of a Stock-Trayding and Portfolio-System

Role: Developer
Branche: Bank, Stock
References: Co. FMIS - Hypovereinsbank in Munich. Contact person Mrs Sterr.

from	02/99	-	03/2000	with	13 months

Administration of stock transactions.
Developing of ORACLE databaseprocedures.
Coordination of projects.
Stockorder validation: orderentrance, routing to the stock markets and protocolling in ORACLE databases.
Developing of automatic flows to store new customers.
Implementing and coordination of the „Erträgnisaufstellung/Jahressteuerbescheid“.
Objectoriented interfaceprograming to BossCube and Xetra
Interfaceprograming between UNIX and AS400.
Objectoriented progaming of Stockedit GUI’s.
Complex SQL-Queries.
Performante PL/SQL-prozedures.
Support of Windows programs for Broker-Controlling.
Support of Customerdata.
Administration of emmisionen.
Daily Stockbuisness.
Year 2000 exchange.
32 Bit exchange.

Realized with:	Operatingsystems	Windows NT 4.0, UNIX Sun Solaris
	Developmenttools	Visual C++ 5.0, Centura SQLWindows 1.5
	Databases	ORACLE 8.x, 7.x, SQLBase
	Emulations, Tools	Hostlink, Unixlink, Telnet, FTP, SQLTalk, SQLPlus.
	Interfaces	BossCube, Xetra.

Developing an Internet-Applet for Credit Scoring

Role: Developer
Branche: Finance and Insurance
References: Co. NSE in Munich. Contact person Mr. F. Nerb.

from	05/98	-	02/99	With	10 months

Internet Applet and Server for a Bausparkasse.
Client/Server application for usage within WWW.

Customerown objectoriented classlibrary (ROI -> CORBA-subamount).
Middleware and IDL programing
Tests with all Internet-browsers, versions and plattforms.
Bauspar-calculatingcore and surfaces
Teamprograming (Sourceadmin).
Databaseadmin, access to ISAM databases.
Develpoing of objectoriented GUI user interfaces.
Printing over DDE interface (Reportdesigner).
Documentation.

Realized with:	Operationsystems	Windows NT 4.0
	Development tools	Java 1.1 and Visual C++ 5.0
	Databases	ISAM Database
	Tools, Libraries	ROI, Middelware, Customerown objectoriented Classlibrary, Internet

Developing a database-admin-program

Role: Developer
Branche: Softwarehouse

from	01/98	-	04/98	with	4 months

Spezification of the Softwarefeatures.
Support and admintools for Access database.
Developing of GUI user Interfaces.
Database administration over ODBC and RDO.
MS DAO interface with JetEngine.
SQL query language.
Documentation.

Realized with:	Operatingsystems	Windows NT 4.0
	Developmenttools	Visual Basic 5.0
	Databases	Access 7.0
	Tools, Libraries	MS-JetEngine, DAO, RDO, ODBC, InstallShield, MSDN

Installation of Network

Role: Developer
Branche: Advertising
References: Co. MPS in Munich. Contact person Mr. Hunsinger.

from	11/97	-	12/97	with	2 months

Planning and installation of a Windows Network (5 PC’s).
Connection protocol NetBUI and Ethernet 10 MBit.
Using a Networkhub.
Installation of Internetaccounts.

Realized with:	Operationsystems	Windows 95, Windows NT Server 4.0.
	Technique	RJ 45 twisted pair wires.

Programing of customer spezific softwaresolutions

Branche: Lasertechnique

References: Co. Baasel in Starnberg. Contact person Mr. Wutz.

from	03/96	-	11/97	with	21 months

Spezifications of the Softwarefeatures.
Customervisits and discussions.
Developing of GUI Interfaces.
Reading of techniqual values from datbases.
Serial communication.
SPS connection of mashines in processstreets.
Connecting of several production pc's with NT 4.0 Server.
Connection to Windows NT pc's to an UNIX-mainframe over FTP protocol.
Administration of Windows NT.
Documentations.
Installations.
Service travels.

Realized with:	Operatingsystems	Windows NT 4.0, Windows 95, Windows 3.x
	Developmenttools	Visual Basic 5.0, C, Visual C++
	Databases	Access 7.0, FoxPro
	Tools, Libraries	MS-JetEngine, DAO, RDO, ODBC, Custom Controls ActiveX from Crescent, OnNet FTP, InstallShield, MFC, MSDN

Developing of a Windows application to measure the pollution of Cars

Role: Developer

Branche: Automobil
