

Munich, 19. May 2026

Profile of Mr. Markus Hopf Dipl.-Ing. (FH)

Picture:

Overview:

- Dipl.-Ing. Computer Engineering (FH)
- Certified Professional Scrum Master PSM
- Certified Spring Professional
- Sun Certified Java Programmer
- Sun Enterprise Trainer
- Sun Certified Enterprise Architect
- OMG Certified UML Professional
- IBM Certified XML Professional

Skills:

- Senior Full Stack Developer
- Cloud Microservice architecture
- Single Page Applications (SPA)
- Jakarta EE, Java, JavaScript, Typescript, Groovy, Kotlin, Scala, Go, Python
- Angular, ReactJs, Wicket, JavaFx
- Spring Boot, Hibernate
- Kafka, NodeJs, npm
- Kubernetes, Docker
- REST API Webservices
- Coordination of Projects

Availability:

From **1.6.2026** 100%

Location:

Munich or Remote.

Conditions:

x,- € per hour.

Experience:

about 30 years

Birthday:

13.02.68

Address: Dipl. Ing. (FH) Hopf, Markus
Klara-Ziegler-Bogen 53, D-81739 München
Mobil: +49 172 / 95 94 590
E-Mail: info@hopf-it.de
Homepage: www.hopf-it.de

Past projects:

HMI

Role: Senior Full Stack Developer
Branche: Software
References: Co. Tagueri in Ditzingen/Remote
Contact person Mr. Russel Krusenbaum
<https://www.tagueri.com>

From	03/2026	- now	with	x months
------	---------	-------	------	----------

REST server JSON encoding based on Java with Spring Boot
Typescript with Angular Web UI
Docker container image as build artifact
Nexus dependencies and target for build artifacts
Creating and optimizing build and CI/CD pipelines
Jenkins Multi-Branch Pipeline
Unit and integration testing with JUnit
Performance testing and monitoring
Ensuring code quality through SonarQube analysis
Optimizing software architecture and deployment processes
PKI Key Generation
Java 21 Spring Boot Applications
JHipster with JDL Schema Files
Ansible for Process Automation
SOAP Interface for data exchange
Message signature with Openssl
Zertificates and PKCS12-Files
Liquibase Database Migrations
Podman Container and Image Management
LDAP Access over Keycloak
Postgres as relational Datenbank
Sonar Quality Checks
E2E Integration Tests
Key Management for Device Communication
Role-based Access Control - RBAC
Provider for critical Infrastructures
Management of Security Modules
Multi-Factor Authentication (MFA)
Crypto know-how
Key distribution and PKI

Device navigation
 Requirements analysis
 Agile development of software projects
 Creation of concepts and requirements
 Functional software testing
 Reducing test and development cycles
 Requirements management, capturing requirements

Realized with: Operatingsystems	Unix, Linux, Windows
Datenbases	PostgreSQL, MariaDB
Developmenttools	IntelliJ, Visual Studio Code
Tools	Angular, @angular/material, bootstrap, eslint, TypeScript, webpack, router, SOAP, JHipster, Ansible, Python, pip, SSH Keys, Openssl, PKCS12, keytool, junit, Java, JakartaEE, JavaScript, podman, Docker, Keycloak, FreeIPA, OpenLDAP, Kerberos, Postgres, Spring Boot, Znuny, IAM, MFA, RedHat, RHEL, Linux, Windows, JIRA, Bitbucket, Exceed TurboX, Jenkins, Sonar, Sonarqube, jacoco, Confluence, checkstyle, archunit, prometheus, JWT, Websockets, Grafana, Logstash, Graylog, checkmk, SNMP, Nexus, gradle, groovy, kotlin, fasterxml, github, vaadin, apache commons, commons, netty, swagger, undertow, jakarta, joda-time, bouncycastle, IntelliJ, jetbrains, eclipse, hibernate, hamcrest, mapstruct, mockito, seleniumhq, slf4j, springframework, wsdl, nodejs, node, npm, Liquibase, REST, JSON, JavaScript, Git, Gitlab, CI/CD, Spring Actuator, Java 21 Streams API, Spring Data, freeIPA, LDAP, LLM, Copilot, Claude, ChatGPT, Polarion

Crypto Key Distribution

Role: Senior Full Stack Developer
 Branche: Software

------	---------	---	---------	------	-----------

Asynchronous Microservices Landscape
30 Microservices for Front- and Backend
Reactive, resilient and scalable Applications
Consequent Usage of Reactive Programming Paradigms
RxJava Reactive Extensions for the JVM
Redux Frontend Component Store with NgRx
NgRx Components
Callbacks, Promises, Futures and Kotlin Coroutines
Event Bus with Non-Blocking Verticals
Asynchronous Event Loop
WebSockets Server-sent Events
Usage of Fluent API
Event Sourcing Pattern
CQRS and Saga Pattern
Eclipse Vert.x Toolkit
Kendo and Angular Material Design UI Components
RESTful URL Design
Vert.x-Web for RESTful HTTP Microservices
AMQP Messaging with Apache Kafka
Migration of Vert.x to Kafka
Distributed Clustering
Asynchronous Data and Event Streams
Implementing Back-Pressure Streams

Virtualised Environments and Containers
Docker and podman Containerization
One Time Password - Multi-Factor Authentication
JWT/OAuth2 based Authorization
CORS - Cross Origin Resource Sharing
CSRF - Cross Site Request Forgery
Zookeeper Cluster Manager
Monorepo Usage with Nx
Keycloak IAM Roles and Rights
Cloud Virtualization-Plattform VMware vSphere
DevOps Gitlab Pipeline
API-Gateway
Python and Robot for Data migration
AWS S3 File Storage
Development of a 110 Control-Panel for the Police
Disposition of Missions
Policeman Management
Tracing Management
Mission Protocol and Management
Location-based Map with Vectordata
Creation of Requirements and Concepts
Creation of Administration Guides
Team Lead

Realized with: Operatingsystems	AWS, Windows, Linux
Datenbases	H2, MariaDB, MsSql, MongoDB, PostgreSQL

Developmenttools Tools	Eclipse, IntelliJ, Visual Studio Code, Jakarta EE, Powershell, maven, gradle, ant, Infinispan, Hazelcast, Vert.x4, Verticle, SLFj4, jackson, netty, logback, assertj, TCP/IP, Http, JUnit5, VisualVM, jMeter, RxJava, RxJS, ReactiveX, JavaScript, REST Assured, Docker Compose, Minikube, Apache Kafka, Apache FreeMarker, Thymeleaf, Pebble, Rocker, X-XSRF- TOKEN, AJAX, XSS, Consul, Kubernetes, Skaffold, podman, Redis, GraphQL, Failsafe, surefire-plugin, Circuit Breaker, Node.js, SockJS, Prometheus, Micrometer, Grafana, ZooKeeper, Ansible, helm, Terraform, GraphHopper, Gitlab, Node18, Java20, Kendo, Angular Material Design, Angular16, Angular Nx, Jest, Karma, Reducer, Robot Framework, Taurus, Hibernate, DozerMapper, Sonar, SOAP, Liquibase, VMware vSphere, Keycloak, IAM, JWT, OpenID Connect /OAuth2, Websockets, nrwl/nx, nx.dev, Cypress, TypeScript, JavaScript, Html, Css, Atlassian, Jira, Confluence, Bamboo, draw.io, Fileon and ColorZilla
---------------------------	--

Online Banking - Customer Focus

Role: Senior Full Stack Developer

Branche: Bank

Service Cut Design

Conception, Consulting and Maintain

Implementation in all Layers

Architecture Diagrams with ADOIT and ArchiMate

Java Spring Boot Microservices

Angular Single Page Application (SPA)

10 Microservices for Front- and Backend

TypeScript, Java, JavaScript, Groovy

RESTful Microservice Architecture

REST API Versioning

Red Hat Open Shift Cloud Environment

Docker Container into Kubernetes Cloud Environment

Jenkins CI/CD-Pipelines

Infrastruktur as Code (IaC)

JSON Web Token (JWT), Bearer- Authorization-Header

Usage of the Omnikanalplattform OKP
Implementation of Java Banking Framework JBF
Kubernetes Commands and Configuration
Quality Tasks with Sonar and Linting
Multi Maven Projects
Nexus Artifact Repository
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Redis In Memory Cache
Host Connection and COBOL Copybook Integration
Testautomation, Performance Analysis, Resilience
Cypress and Karma Tests
Sleuth, Zipkin, Opentracing, Dynatrace
Grafana and Dynatrace Monitoring
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
NGINX Configuration
Soap Communication Protocol
Kubernetes Secrets Configuration
Semantic Versioning
DevOps with CI/CD Jenkins Pipelines
Unix Shell Scripts with bash
Web Performance Analysis Tools
Data Exchange with WSDL and SOAP
Creation and Maintenance of Helm Charts
JMeter Heavyweight Tests
Development Parts for Online Banking Platform
Browser and Mobil based Banking as Single Page Application (SPA)
Creation of Concepts
Creation of Administration Guides
Reviews of Sourcecode
Support of Developers
Coordination Dev and DevOps Tasks
Remote Communication over MS-Teams
Agile Development in Scrum Team and SAFe
Grooming, Planning, Retrospective, GIP
Communication in English and German
OnlineBanking and VR Banking App

Realized with: Operatingsystems Datenbases	Red Hat Open Shift, Windows, Linux H2, Oracle
---	--

Developmenttools Tools	Eclipse, STS, IntelliJ, Visual Studio Code Powershell, ADOIT, ArchiMate, LeanIX, Mapstruct, Hazlecast, Java 17, JUnit 5, Jupiter, Lighthouse, web.dev, requestmap.webperf.tools, webpack- bundle-analyzer, WebP, Angular 15, Postman, newman, Swagger, Git, Bitbucket, Jenkins, OTC, helm, Red Hat OpenShift, AWS, Kubernetes, NGINX, Ingress, JMeter, Kafka, Teams, TypeScript, Groovy, JavaScript, Jasmine, Cypress, Mocha, Chai, Karma, Gherkin, cucumber, mural, xrepository, Sleuth, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Docker, JPA, Hibernate Envers, LogBack, Log4j2, JWT, Maven, Nexus, Sonar, Lint, Hystrix, H2, Oracle, MsSQL, PostGre, Liquibase, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, Kubectl, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, Nx, ngx/store, @ngrx/component-store,, IBM RecordClassGenerator, Redis, Grafana, Prometheus, Istio, kibana, Confluence, JIRA, OpenAPI, ReadyAPI, planitpoker, electron, conceptboard.com, miro, wiremock, lucidchart, arc42, Sketch MeaXure
---------------------------	---

Shared projects for judiciary - GeFa

Architecture Responsibility and Service Cut

Domain based Microservices

Conception of Cross cutting themes

BSI Security-Requirements

Analysis of None-Functional-Requirements

Conception, Maintain and Consulting

Creation of Architecture Concepts

Greenfield Project

Communication with Senior Full stack Devs

Angular Single Page Application (SPA)
Browser based Court-WebApp
Approx. 30 Microservices for Front- and Backend
TypeScript, Java, JavaScript, Groovy
RESTful Microservice Architecture
REST API Versioning
Framework for Standardization of Microservices
Open Telekom Cloud Environment OTC
Docker Container into Kubernetes Cloud Environment
Jenkins CI/CD-Pipelines
JSON Web Token (JWT), Bearer- Authorization-Header
Kubernetes Commands and Configuration
Relational SQL Scripts
Database Connections and Liquibase Migrations Scripts
Hystrix latency for Fault Tolerance
CircuitBreaker, FeignClients, SoapClients
Quality Tasks with Sonar and Linting
Multi Maven Projects
Nexus Artifact Repository
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Testautomation, Performanceanalysis, Resilience
Cypress and Karma Tests
Sleuth, Zipkin, Opentracing, Dynatrace
Monitoring, Security
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles with trunk-based-development
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
Ingress Service Discovery
NGINX Configuration
Soap Communication Protocol
Kubernetes Secrets Configuration
Semantic Versioning
Angular State Management with ngxs/store, Actions and Reducer
Angular Material Design UI Components
DevOps with CI/CD Jenkins Pipelines
Shell Scripts
Web Performance Analysis Tools
Data Exchange with WSDL and SOAP
JMeter Heavyweight Tests
Operation of Certification Authority (CA) for PKI

Usage of Public-Key-Infrastructur (PKI)
 Meetings with business domain experts
 Development of a Court-Software for the German Justice
 Browser based Court-App as Single Page Application (SPA)
 Ca. 100 involved Persons in Development
 Reviews of Sourcecode
 Coordination of Devs and DevOps Tasks
 Agile Development in a Scrum Team and SAFe
 Grooming, Planning, Retrospective
 Communication in English and German

Realized with: Operatingsystems	Open Telekom Cloud (OTC) , Windows, Linux
Datenbases	H2, Oracle, MsSQL, PostGre
Developmenttools	Eclipse, STS, IntelliJ, Visual Studio Code
Tools	ArchiMate, LeanIX, Mapstruct, Hazlecast, Java 11, Lighthouse, web.dev, requestmap.webperf.tools, webpack-bundle-analyzer, WebP, Angular 13, Postman, newman, Swagger, OpenAPI, Git, Bitbucket, Jenkins, OTC, Kubernetes, NGINX, Ingress, JMeter, Teams, WebEx, Angular, TypeScript, Groovy, Java, JavaScript, Jasmine, Cypress, Mocha, Chai, Karma, Gherkin, cucumber, mural, xrepository, XJustiz, Sleuth, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Docker, JPA, Hibernate Envers, LogBack, Log4j2, JWT, Maven, Nexus, Sonar, Lint, Hystrix, H2, Oracle, MsSQL, PostGre, Liquibase, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, KubectI, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, Nx, ngxs/store, Prometheus, Eclipse, STS, IntelliJ, kibana, Confluence, JIRA, coyo

Housing-saving Calculator and Taxes

Role: Senior Full Stack Developer

Branche: Finance

References: Co. Fiducia GAD in München/Aschheim

Contact person Mr. Matthias Leukert, Mr Erich Burggraf, Mr. Martin Hahn

AMQP Messaging - Advanced Message Queuing Protocol
Usage of the Omnikanalplattform OKP
Implementation of Java Banking Framework JBF
JSON Data Communication
Alerting, Health Checks
Postman, Swagger, OpenAPI
Camunda Process-Engine
Camunda BPMN-Workflows and DMN-Decisions
Testautomation, Performanceanalyze, Resilienz
Selenium, Fitnesse, Protractor and Karma Tests
Zipkin, Opentracing, Dynatrace
Monitoring, Security
Spring Boot, Spring Data, Spring Cloud OpenFeign
Release and Feature Toggles with trunk-based-development
Spring Expression Language
NodeJs JavaScript Backend Development
JavaScript NodeJs Tests with Mocha and Chai
Consol Service Discovery
Soap Kommunikations Protokoll
Openshipt Secrets Konfiguration
Semantic Versioning
Angular State Management with ngxs/store, Actions and Reducer
Angular Material Design UI Components
Migration towards Angular 11
JQ Json Parser
DevOps with OpenShift CI/CD Jenkins Pipelines
Shell Scripts
Web Perfomance Analyse Tools
Data exchange with WSDL and SOAP

JMeter Robustness Tests
 Developing of a Housing-saving Calculator
 Enhancement of the Bank Desktop - BAP
 All kind of taxes sheets
 REST Interfaces tou BAP, KAPST and agree21
 Meetings with buisness domain experts
 Reviews of Sourcecode
 Dev and DevOps Tasks
 Remote Communication over Skype and Gotomeeting
 Agile Development in a Scrum Team and SAFe
 Grooming, Planning, Retrospective
 OnlineBanking and VR Banking App
 Communication in English and German

Realized with: Operatingsystems	Azure Cloud, Windows, Linux, Ubuntu KDE
Datenbases	H2, Oracle
Developmenttools	Mapstruct, Hazlecast, Java 11, miro.com,
Tools	HashiCorp Consul, Lighthouse, web.dev, requestmap.webperf.tools, webpack-bundle- analyzer, WebP, Angular 11, Postman, newman, Swagger, OpenAPI, Git, Bitbucket, Jenkins, Red Hat OpenShift, Azure, Camunda, Spin, JMeter, IBM Lotus Notes, Teams, GotoMeeting, Angular, TypeScript, Groovy, Java, JavaScript, Selenium, Jasmine, Protractor, Mocha, Chai, Karma, Fittesse, Zipkin, Opentracing, Dynatrace, Spring Boot, Spring Data, Kubernetes, Docker, AMQP Messaging, JPA, Hibernate, Log4j2, JWT, Maven, Gradle, Nexus, Sonar, Lint, Hystrix, H2, Oracle, SQL, Flyway, NodeJs, npm, yarn, Checkstyle, curl, JIRA, OWASP, Kubectrl, yaml, Notepad++, GraphQL, SASS/SCSS, SmartBear SoapUi, Citrix, Telegram, SourceTree, SmartGit, Lombok, @angular/material, SQLDeveloper, ngxs/store, allure, IKESA, VR-NetKey, aqua, Grafana, Prometheus, funretro.io, IntelliJ, consul.io, gson, kibana

Digital Marketplace - G2M

Role: Full Stack Developer

Branche: Telecommunication

References: Co. Rohde & Schwarz in München

Contact person Mr. Patrick Bauriedl, Mr. Ivan Kostov, Mr. Christ. Maurer

<http://www.rohde-schwarz.com>

from	09/2019	- 12/2019	with	4 months
------	---------	-----------	------	----------

Development of Digital Marketplace Applications
WebShop Development with Angular and NodeJs
Backend and Frontend with TypeScript and JavaScript
Packet Manager npm and yarn
Azure Cloud based PaaS
Docker based MicroServices
Docker Compose multi-container solutions
Harbor Registry for Docker images
Git Hooks with Husky
Red Hat OpenShift Pods
OKD Jenkins Pipelines and Clusters
Administration of OpenShift Clusters
OC and Kubectl CLI commands
Yaml Templates as OpenShift Service Definition
Azure Service Bus for asynchrones Messaging
REST API Routes with Versioning
OpenAPI, Swagger Documentation
Authentification over SAML Service
NoSQL Datenbase MongoDB
Configuration as Code with Jenkinsfiles
CI/CD Pipeline
Distributed Tracing, OpenTracing
OWASP and Lizence checks
CSS Styles and Html Templates
Jasmine, Karma and Robot Tests
Test with Robot Framework and RIDE Suites
Python Scripte for Test Automation
Sonar and Checkstlye Coverage
Dev and DevOps Duties
Development of a generic Webshop
Shop Extensibility for cloud products
Go-2-Market Applications - G2M
Identity and Access Management - IAM
Remote Communication over GotoMeeting
Agile, remote Scrum Team
Grooming, Planning, Retrospective
Project language English

Realized with: Operatingsystems Datenbases	Azure Cloud, Windows, Linux, Ubuntu KDE MongoDB, CosmosDB, mySQL
---	---

Developmenttools Tools	Red Hat OpenShift, Azure, MongoDB, Docker, Visual Studio Code, Notepad++, Citrix, Chrome DevTools, TypeScript, Angular, ReactJs, Jasmine, Karma, Robot Tests, ESLint, NodeJs, npm, yarn, PMD, Checkstyle, Sonar, JIRA, Docker, Proxyfier, Postman, Hyper-V, VMware, Skype, git, bash, zipkin, jaeger, depcheck, module-structure, retire.js, OWASP, Harbor, CosmosDB, Husky, OKD, OC, Kubernetes, Kubectl, Keycloak, MockServer, Ubuntu KDE, Kate, Dolphin, robotframework, RIDE, Python, pip, MarkdownViewer++, Markdown Extension, json, yaml, JWT, APISimulator, draw.io, Studio 3T, OpenAPI, Swagger

Developmenttools Tools	NodeJs, npm, ReactJS, JavaScript, Mocha, ES6, JSX, Redux, PhantomJS, Jest, enzyme, sinon, Lerna, karma, Lanterna, ESLint, Java 8, Spring Core, Spring Data, JPA, Hibernate, Mockito, JMX, Git Bash, Gogs (Go Git Service), Jenkins, TeamViewer, REST, Json, Postman, SQLDeveloper, ORACLE, MSSQLServer, iBatis+Liquibase DB Migration, Eclipse Neon, JBoss, Wildfly, Gradle, Maven, artifactory, Visual Studio Code Editor, sublime, Atom, Notepad++, JSP, JQuery, HTML, CSS, OpenLayers, jacoco, Skype, Confluence, JIRA, Jing, Nagios, Bizagi Modeler, Bamboo Paper, XMind Mindmaper, realtimeboard, linoit, Scrum

Vehicle calculator for classic cars - ANDIE

Role: Full Stack Developer
Branche: Insurance
References: <http://www.aioinissaydowa.eu>
Co. AIOI in Munich/Ismaning.
Contact person Mr. Martin Brauner.

from	10/2016	- 03/2017	with 6 months
------	---------	-----------	---------------

Angular frontend development
Spring backend development
Development with Java 8 language features
REST call interface with Promises and Observables
Asynchron client/server communication with callbacks
Cross-Origin Resource Sharing (CORS) implementation with Spring
Protection against Cross Side Scripting (CSRF) with Spring
Grunt and Maven as Build Tool
Project modularization in Node.js, npm submodule
JSON and YAML file formats
Usage of HTML5 and CSS

Protractor E2E Tests
 Jasmine Test Framework
 Selenium Web Driver Tests with PhantomJS
 Oracle VirtualBox for Vagrant virtualization
 Migration with Postgre datenbase scripts
 Complete new development in small team
 Tariff calculation of car insurances for end customers
 Customer registration with Double-Opt-in
 Automated E-Mail delivery
 Confluence Jira for communication
 Process model with Scrum Team
 Communication with Test Team

Realized with: Operatingsystems	Windows, Linux
Database	PostgreSQL
Developmenttools	Flyway, Mockito, EasyMock, TSLint, Balsamiq,
Tools	Hibernate, Node.js, npm, Firebug, VS Code, CSS, HTML5, SonarLint, Spring Data, Spring Core, Spring Boot, GitHub, Angular2, Apache Commons, Docker, Vagrant, Jing, JIRA, Confluence, Json, YAML, SoapUI, Log4j, git, mvn, SourceTree Git Browser, Nexus, Jenkins, REST, JPA, DBeaver, PostgreSQL, Eclipse, STS, Java 8, putty, WinSCP, Notepad++, subethasmtplib

Telephone Number Porting with Java EE

Role: Backend Developer
 Branche: Telecommunication
 References: <http://www.consol.de>
 Co. ConSol in Munich.
 Contact person Mr. Thomas Michal, Mr Andreas Berger.

------	-------------------	------	----------

EJB backend development
 Webservice REST Client/Server communication
 Angular2 web development with TypeScript
 TypeScript as abstraktion for JavaScript
 Migration von EJB 2.1 nach EJB 3.0
 Spring data for JPA repository access
 TestNG components tests
 Oracle WebLogic Application Server
 Oracle PL/SQL Stored Procedures
 RMI - Remote Method Invocation
 Workflow engine

MSISDN migration over staging tables
 JavaScript development
 Node.js and npm for packages and modules management
 JPA entity development with EclipseLink
 Java 8 language features
 Jenkins continues integration job administration
 Citrus integrations tests
 Maven multi project profile
 Data migration of mass data
 x.400 gateway and 2MRDB porting
 CORBA Tuxedo connector
 CORBA IDL
 Scrum Master tasks
 Telephone number porting
 Import and export of telephone numbers for prepaid- and postpaid brands
 Starter Pack SIM migration
 Git branching strategies and pull requests
 Atlassian tool suite for communication
 Confluence Jira for processes
 Bugtracking over ClearQuest
 Load-tests
 Realization within a scrum team
 Coordination with domain experts
 Communication with test-team

Realized with: Operatingsystems	Windows, Linux
Database	Oracle 11
Developmenttools	Eclipse, IntelliJ
Tools	Flyway, MyBatis Migration, Mockito, EasyMock, Hibernate, maven-replacer-plugin, Node.js, npm, Broccoli Plugin, TypeScript Eclipse Plugin, Firebug, VS Code, SonarLint, TestNG, Spring Data, Atlassian Suite, Bitbucket, Confluence, JIRA, HipChat, ClearQuest, ClearQuest, GitHub, AngularJS, Apache Commons, Docker, Jing, JIRA, Confluence, Json, Log4j, Citrus, git, mvn, ant, Nexus, Jenkins, Oracle WebLogic, SoapUI, REST, JPA, SQLDeveloper, ORACLE, Eclipse, Java 8, putty, WinSCP, Notepad++

Multiple Assembly Planning & Process System - MAPP

Role: Backend Developer
 Branche: Automotive

References: <http://www.gigatronik.de>

Co. Gigatronik in Munich.

Contact person Mr. Stefan Hanel, Mr. Michael Voitenleitner.

EJB development

Webservice REST Client/Server communication

JPA entity development with EclipseLink

JPA criteria API

Java 8 language features like Lambdas

Aspect oriented interceptors

DB modeling

Jenkins continuous integration job administration

JUnit Mockito tests and integration tests

Maven multi project profile

Usage of JRebel

JSON data exchange format

Data migration

JavaFx client development

JavaFx design with scene builder

Glassfish configuration

LDAP connection

SONAR metrics

FitNesse tests

Generic realization of MAPP for car production and planning of BMW vehicles

Part project coordination

Coordination with domain experts

Communication with Test-Team

Organization development meetings

'Clean Code' principles

Implementation and technical realization

Senior developer

Scrum Master tasks

Realized with: Operatingsystems Windows, Linux

Database Oracle 11

Developmenttools SezPoz, Apache Commons, Jing, Jersey, Json,
Tools Log4j, EclipseLink, MQ, JRebel, mockito, SVN,
mvn, FitNesse, Nexus, Jenkins, Sonar, Jubula,
Glassfish, REST, JPA, SQLDeveloper,
ORACLE, Eclipse, JavaFx, JAutodoc, LDAP,
ScenicView, SceneBuilder, Java 8

Online portal for ambulant, medical services - OPAL Web-Application

Role: Backend-, Frontend-Developer

Branche: Health Insurance

References: <http://www.kvb.de>

Co. KVB in Munich. Contact person Mr. Matthias Geiss.

from	09/2012	-	07/2015	_	with	35 months
------	---------	---	---------	---	------	-----------

- Development of the online portal OPAL
- Extension of existing service interfaces
- Spring Core for Dependency Injection CDI
- Spring Web Flow for page navigation
- Spring Restful Webservice implementation
- Spring authentication and authorization
- Browser plausibility with JavaScript
- Buildmanagement with Gradle Buildsript in Groovy
- Continues Delivery with FeatureToggles
- Dynamic configuration of features with Framework 'Togglz'
- Webservice requests with SoapUI
- Agile DB migration with flywayDB
- Programming with Java 7
- Creation of SQL Scripts
- Serverside validation with Rhino Script Engine
- XSLT transformation of data to Sciphox and EHD format
- Further development of the JSP pages
- WebTests with JUnit and Selenium Browser Plugin
- Configuration of Jenkins Jobs for CI, NB and INT environment
- Timeline versioning of business change requests
- Usage of Jenkins plugins
- Configuration of Jenkins Jobs for CI, NB and INT environment
- Usage of Gradle and Maven as build tools
- Release management with maven release plugin
- Assembling and deployment with maven
- Maintainance of data in integration
- Development of ORACLE SQL statements for ABN and Production
- Defining of SQL scripts for DB handover process
- Maintainance of data with PL/SQL scripts
- File exchange formats .json and .yaml
- Asynchron processing over ONDES and KV-Connect interface
- Test Driven Development - TDD
- WebTests with JUnit and Selenium browser plugin
- Load Tests of Webservices with SoapUI
- Threading and Web Load-Tests with LoadUIWeb
- Remote access via Secure Shell (SSH) and odin
- Documentation of medical reports in the online portal (OPAL)
- Submission of electronic documentation to the KVB
- Export of data to Sciphox xml format

Support of the following medical documentations:

Allergologie, Balneophototherapie, Belastungs-EKG, Darmkrebsberatung, eDMP, DMP-Brustkrebs, Hautkrebsscreening, Koloskopie, Multiple Sklerose, Risikoprävention bei Kinderwunsch, Schmerztherapie, Sonografie Schwangerschaftsvorsorge, Tonsillotomie, Gastroskopie, Onkologie

New development of medical documentations like Hörgeräte, Molekulargenetik and Sozialpsychiatrie

Extension of the online documentation OPAL for medicians

Scrum with Daily Standup and Retrospective

Realized with: Operatingsystems	Windows 7, Linux
Database	Oracle 11g
Developmenttools	J2SE 7, STS - Spring Tool Suite, Kepler Eclipse
Tools	Java EE IDE for Web Developers, Tomcat 7, Jenkins Flow Plugins, Flyway, WinSCP, putty, Nexus, SONAR, ONDES, KV-Connect, Linux, PdfBox, Lombok, Gradle, Groovy, Spring MVC, SoapUI, Feature Toggly, Secure Shell (SSH), TLS, SSL, Burp Proxy, FoxyProxy, Hamcrest, Confluence, odin, DbSetup, flywayDB, maven release plugin, LoadUIWeb, Java 7, JavaMelody, xml-unit, JDedend, Spring Core, Spring Web Flow, Oracle SQL Developer, EJB 3.1, JPA, CriteriaAPI, SVN, Subclipse, Subversive, Tortoise, Firebug Firefox Addon, Selenium Plugin, Live HTTP headers Firefox Addon, EclEmma Eclipse Addon, CheckStyle, Maven, Tomcat, JUnit, XSLT, HttpUnit, DbUnit, Jenkins, joda-time.jar, jQuery, JavaScript Rhino Engine, JavaScript

Web Wiki/Community Angeln.de (Fishing website)

Role: Backend-, Frontend-Developer

Branche: Softwarehouse, Startup Company, Printmedia

References: <http://www.angeln.de>
<http://www.woont.com>

Co. Woont in Munich. Contact person Mr. Dirk Wermuth.

from 10/2011 - 08/2012 with 11 months

Complete relaunch in a small team

Development of a Social-, Community-, Shop- Web-Application

Implementation of various Web-Applications around www.angeln.de

Web-Frontend, Shop, Editor and Admin realized as Web-Apps

Integration of social networking pages, linkage to other Web-Apps of the domain

Data import with SQL scripts and java importer

Development with Glassfish, Embedded Glassfish and Embedded Jetty
 Creation of generic, reusable Ajax Wicket components
 Extensive development of Ajax components for Web 2.0
 Searching and sorting of datatables with Ajax
 Usage of tables with paging navigator and ListView
 Programming of image galleries with DataViews
 Dynamic menus with changing contexts
 Working with Wicket IModel variations like PropertyModel and CompoundPropertyModel
 Layers Design Pattern - Design and call of interfaces to the backend
 Implementation of SEO (Search Engine Optimization) techniques
 Localized URL generation in various languages
 Persistence layer with EJB, JPA and Criteria API
 Geolocating of addresses with EJB Timer Bean
 Google Maps integration with JavaScript Google API
 Bean validation over various layers using JSR 303
 Maintenance of the persistence service
 Schema maintenance and enhancements for the database
 Implementation of image and logo uploads
 Cropping and converting of images with ImageMagick API
 Image converting using im4java API for various web formats
 Usage of Maven Multi Modules with personalized profiles
 CSS adjustments and CSS generation using less compiler
 Bug tracking system OTRS
 Continuous integration and nightly build using Jenkins
 Spring Dependency Injection Integration DI
 CSS and JavaScript development and debugging with Firebug plugin for Firefox
 Usage of EcEmma coverage eclipse plugin
 Generic programming using java generics
 Consequent usage of JUnit regressions tests, standard technologies and standard tools for development

Realized with: Operatingsystems	Windows 7, Linux, Ubuntu
Database	PostgreSQL 9

Developmenttools Tools	J2SE 6, Eclipse 3.6.2 Helios, Glassfish Embedded, Glassfish 3.1.1, Embedded Jetty EJB 3.1, JPA, CriteriaAPI, Apache Wicket 1.5, Eclipse, SVN, Subclipse, Subversive, Firebug Firefox Addon, Live HTTP headers Firefox Addon, PrefBar Firefox Addon, AnyEdit Eclipse Addon, EclEmma Eclipse Addon, Maven, glassfish, Tomcat, Jetty, JUnit, Selenium, Jenkins, PMD, FindBugs, joda-time.jar, guava.jar, Skype, SQuireL SQL, PostgreSQL DB, gforge, tickspot, MindMap Freeplane, im4java, ImageMagick, GraphicsMagick, jQuery, less, JCrop, OTRS, Facebook, Twitter, YouTube, Google Maps API, fancyBox
---------------------------	--

JEE Tariff Calculator and Webservice

Role: Backend-, Frontend-Developer

Branche: Insurance

References: <http://www.lv1871.de>

Co. LV1871 in Munich. Contact person Mr. Alexander Gold.

from	07/2009 - 07/2011	with	25 months
------	-------------------	------	-----------

Relaunch/Development of the existing Tariff Calculator software with Apache Wicket Framework

Development/Maintenance of the existing Tariff Calculator software with Apache Struts

Components with usage of Wicket HTML markup inheritance development

Development of advanced Gui functionality beyond the Wicket Extensions (like "close button" on tabulators)

Wicket Ajax component development

Development of company web based components

CSS and JavaScript development and diagnosis with Firebug Plugin for Firefox

Generating of path notation with 'bindgen' utility and @Bindable annotation for type save Wicket ID's

Extension handler for XStream and Castor marshallers for object to XML generators

Implementation of the BiPRO insurance webservice standard

Schema validation and WSDL generation

Design of complex element inheritance in XSD schemas

Usage of JAX-WS webservice framework

JAXB XML marshalling resp. XML serialization to java

Generic programming because of java generics usage

Loadtests with SoapUI against the webservice implementation

Design of the technical and logical validation of the webservice

Development of various XML namespaces

Implementation of various insurance tariffs

- Extensions on the existing tariff software
- Maintenance of the productive platform
- PDF generation with Apache FOP
- XSL transformation in several steps up till to printable XSL-FO documents
- Strict validation of XSL templates and XSL-FO elements
- Integration of the printable XSL-FO documents into the webapplication
- Refactoring of the exception handling
- Maintenance of the intranet and Wiki
- Consistent Usage of JUnit regression tests, standard technologies and standard tools for development
- Spring integration
- Usage of Core Spring for better Testing
- Usage of various JEE / J2EE Pattern like SessionFacade, ServiceLayer, Transfer Object Assembler, DTO, DAO, ...
- COBOL *.cpy integration, calls to tariff calculator cores
- Automated XML printjobs
- Implementation of 'lucene' search engine functionality
- Usage of EclEmma Coverage Eclipse Plugin

Realized with: Operatingsystems	Windows 7, Windows Vista, Windows XP, Linux, AIX
Database	HDB, DB2
Developmenttools Tools	J2SE 6.0, Eclipse 3.x, Jetty6, Tomcat6, Live HTTP headers, Firebug, Citrix, STS, Subversion SVN, CVS, WinSCP, PuTTY, Extreme Planner, Firefox, Opera, Safari, Windows 7, Windows Vista, Windows XP, commons beanutils, xalan Parser, xerces Parser, JUnit, httpUnit, Spring, Bindgen, ant, maven, Jenkins/Hudson Nightly Build Tool, Emma Test Coverage Frameworks, JAX-WS Webservice Framework, SoapUI, UML Enterprise Architect, XMLSyp, Notepad++, Bouncy Castle Cryptography Library, JDom, xstream serialize XML, Apache Struts, Apache Wicket, Apache log4j, Apache FOP, BiPRO, JAXB, WSDSL2Java, cygwin

Smartphone Web and App Development

Role: Backend-, Frontend-Developer

Branche: Entertainment

References: http://www.androidzoom.com/android_applications/trivial+dice/by_matching
<http://www.m.hopf-it.de>

from	09/2010 - 10/2010	with	1 month
------	-------------------	------	---------

Web app Development for Smartphones

- Usage of iui - User Interface (UI) Framework from Google
- Development of the own homepage in mobile format
- Development of a Simple dice which rolls in 2D graphic, if you tap the screen
- Game development: Trivial Dice
- Conception of the layout
- Design of the graphic
- Development of the statemachine
- External event handling
- Consideration of different resolutions
- Testing of various devices with emulator
- JUnitTest suite for the App
- Lite version with reduced feature set
- Pro version with different access rights
- Playing of audio file
- Familiarization with the Anroid SDK and Google iui, JQTouch Framework
- Multi lingual description
- Versioning in Android Market

Realized with: Operatingsystems	Windows 7
Database	-
Developmenttools	J2SE 6.0, Eclipse 3.x, Google iui Framework,
Tools	JQTouch Framework, Android SDK, Eclipse Plugin, JUnit

JEE Webapplications for Ring Back Tones

Role: Backend-Developer

Branche: Telecom

References: <http://www.ect-telecoms.de>

Co. ect-telecoms in Munich. Contact person Mr. Robert Parkes, Mr. Hans Huber, Mr. Ahmed Ferdous.

from	09/2008 - 06/2009	with	10 months
------	-------------------	------	-----------

- Creation of web applications with Tomcat, JSP, Spring and Hibernate
- HTTP Authentication with Basic and Spring XwsSecurity method
- Porting respectively migrating the integration layers from Oracle to HSQL database
- Porting of Oracle schemas and data to HSQL database
- Realization of a standalone reference web client as a presentation application
- Implementation of a Soap Services with JAXB to upload binary content
- Configuration of ant scripts and make them runnable under LINUX and Windows
- Extension of the Soap core component with new features
- Publishing the new features as web service
- Porting the Codehouse XFire web service architecture to Spring WS respectively Apache CXF Framework
- Mobile Communication over USSD Service Codes and XML-RPC.
- MDA UML transformation to XSD

XSD schema definition for automatic generation of the model and soap classes
 JAXB XML marshalling respectively XML Serialization to Java
 Basic Apache webserver configuration
 Remote installation and deployment onto customer servers
 Creation of Spring, maven and ant configurations
 Error tracking with Jira as bug tracking system
 Initialization and introduction of Apache Continuum as Nightly Build process, JUnit
 Tests, Nightly Build, SVN Tags and Branches, measure of test coverage, Intranet
 Wiki.
 Load tests for Soap web services with soapUI
 junit regression tests
 Consequent usage of JUnit regression tests, standard technologies and standard
 tools in the development
 Team communication and documentation completely in English

Realized with: Operatingsystems	Windows; Linux
Database	Oracle, HSQL
Developmenttools	J2SE 5.0, GIMP PictureEditor, ColorZilla
Tools	Colorpicker, FireFTP, Notepad++, Cygwin, HSQL, ORACLE10g, Eclipse 3.4, Tomcat5.5, Live HTTP headers, Squirrel DBViewer, SQLDeveloper, SQLPlus, DbVisualizer, VNC, 7- Zip, Tortoise, Subversion SVN, WinSCP, PuTTY, Jira Bugtracking, Clearspace, Thunderbird, Firefox, Ace WINScreen, Windows XP, Linux Ubuntu, Spring, Hibernate, ehcache, OSGi, commons, myfaces, xalan, xerces, JUnit, httpUnit, ant, maven, Codehouse XFire, Apache CXF, XML-RPC, redstone XML-RPC library, GSM Services, EMF (Eclipse Modelling Framework), GMF (Graphical Modelling Framework), SOAP, Spring WebService, jstl, acegi security, JavaScript, JavaScript Debugger Venkman, clover and emma test coverage Frameworks, Apache CXF Webservice framework, soapUI, UML Enterprise Architect, StarUML

J2EE accounting system for health insurance (nPROD)

Role: Developer

Branche: Health Insurance

References: <http://www.azh.de>

Co. VSA/azh in Munich. Contact person Mr. Weber, Mr. Herrmann.

from 04/2006 - 08/2008 with 28 months

New product development of an automatic accounting system for health- and auxiliary material

Analysis and design with UML 2.1

Requirement analysis and review with business and domain experts

Use Case description with the CASE Tool MagicDraw

MDA usage for the persistence layer

Usage of a persistence framework (Marvin) for the modelling of the DB

Modelling of GUI workflows with the CASE Tool MagicDraw

Usage of a GUI workflow framework

SWING masks with GidBagLayout

Extensive usage of CVS (Tagging, Branching, Merging)

Rule based approach for frequently changing requirements

Migration of the project to the Spring application framework

Migration of the existing data to the new structure using CSV files

Adaptation of the data structures for the data import

Data import from ABDA pharmacy position data

Electronic data exchange (DTA) with health insurance company

JUnit-Tests for the business logic and the GUI

Quality ensured with 80% JUnit test coverage and CheckStyle coding conventions

Maintenance and rollout

Attendance of the project from beginning to the end (product version 1.0)

Incremental approach on database changes with update scripts

Practical experience with a reference database

Automatic price calculation for diverse health insurance funds in southern Germany

Tasks: master data, price calculation, prescription position management, master agreement, DTA key management.

Development of an account software nPROD for automatic recipe processing.

Communication with an understaffed domain department.

Quality enhancement with coupling- and dependency metrics

Realized with: Operating systems Windows
--

Developmenttools Tools	J2SE 5.0, Eclipse 3.3, Jbossrules, Drools Regel-Engine, RuleEngine, Castor as XML Mapper, Clover for Testcoverage, JUnit for Programtests, CheckStyle, ANTLR (ANother Tool for Language Recognition) Parser Generator, Ant, JReport Presentationtool/FOP, Marvin proprietary Persistence Framework and Spring Persistence Framework 2.0, GUI Workflow Framework, IntelliJ 4.5, Jboss 4, MagicDraw 14, DB2-Client 7.2.0, Citrix Emulator, DBVisualiser, Toad, Squirrel, SQL Workbench, WinCVS 2.0, TortoiseCVS, Firefox, Thunderbird, Nvu (Html-Editor), cygwin Unix Emulator, PuTTY, WinSCP
---------------------------	---

J2EE WebShop

Role: Developer

Branche: eCommerce

References: <http://www.publicWEBshop.com>

from	12/2005 - 02/2006	with	3 months
------	-------------------	------	----------

Webapplication to run an online web shop.
 Generic webshop for all kinds of businesses.
 Freely configurable with many settings and preferences.
 JSF Technologie, Apache MyFaces/Tomahawk .
 Axis WebService JAX-RPC interface for B2B SOAP communication.
 EJB, JSP and Servlets.
 Struts and tiles.
 Apache Commons.
 AJAX asynch. communication on the client tier.
 Object persistance with Hibernate.
 Struts and tiles.
 Logging with Log4j.
 JavaScript and cascading stylesheets (CSS).
 Planning and maintaining of a MySql database.
 UML analysis and design.
 XML for configuration files.
 Multilingual for international purpose.
 HTML, XHTML and Flash as presentation technique.
 Tests with Jakarta JMeter and JUnit.
 Future: XSLT and XSL-FO for PDF generation.
 Future: EJB/JBoss/Spring.

Realized with: Operatingsystems	Windows, Linux
---------------------------------	----------------

Developmenttools Tools	Eclipse 3.1, Enterprise Architect, XMLSpy Enterprise Edition, JBoss, Tomcat 5.5, Struts, Ant, JUnit, Macromedia Flash and Dreamweaver, div. Eclipse Plugins, MySQL 5
---------------------------	---

Trainings and Consulting

Role: Developer

Branche: All areas

Internet application for an billingsystem

Role: Developer

Branche: Bank, Billingsystem

Reference: Landeszentralbank (LZB) Bayern in Munich. Contact person Mr.
 Stuckmann.

from 05/2000 - 09/2001 with 17 months

Analysis and design with UML and Rational Rose.
 Refactoring, Reengeneeing of UML Modells, realised with Java and C++.
 Generic modelling with RUP. Generation of artifacts.
 JavaBeans and serverside Enterprise JavaBeans development.
 XML documents with Schema spezifikation.
 JSP pages and Java Servlets development.
 Java Script programing for all browsers.
 Webapplications and Webcomponents.
 JSP Engine configuration and support.
 C++ Framework development with STL.
 JNI API for destributet objects in C++.
 Crypt with Legacy Systems from RSA and PKI.
 Webserver IPlanet and IIS configuration and administration.
 Complex SQL-Queries.
 SWIFT SIPN and InterActBrowse connection.
 SWIFT Webstation support and configuration.
 Performant PL/SQL-prozedures.
 Administration of ORACLE database.
 Team-Software development with versioning-software Merlin.

Realized with: Operatingsystems	Windows NT 4.0, IIS WebServer
Developmenttools	Visual C++ 6.0, JBuilder 3.5
JSP Engines	Apache TomCat, Allaire JRun 3.1
Databases	ORACLE 8.x, DB2

Emulations, Tools	Rational Rose 7.5, Telnet, FTP, SQL-ODBC-Viewer, SWIFT Webstation
Interfaces	JNI, XML, SWIFT-SIPN

Administration and support of a Stock-Trading and Portfolio-System

Role: Developer

Branche: Bank, Stock

References: Co. FMIS - Hypovereinsbank in Munich. Contact person Mrs Sterr.

from	02/99	-	03/2000	with	13 months
------	-------	---	---------	------	-----------

Administration of stock transactions.

Developing of ORACLE databaseprocedures.

Coordination of projects.

Stockorder validation: orderentrance, routing to the stock markets and protocolling in ORACLE databases.

Developing of automatic flows to store new customers.

Implementing and coordination of the „Ertragnisaufstellung/Jahressteuerbescheid“.

Objectoriented interfaceprograming to BossCube and Xetra

Interfaceprograming between UNIX and AS400.

Objectoriented progaming of Stockedit GUI's.

Complex SQL-Queries.

Performante PL/SQL-prozedures.

Support of Windows programs for Broker-Controlling.

Support of Customerdata.

Administration of emmisionen.

Daily Stockbuisness.

Year 2000 exchange.

32 Bit exchange.

Realized with: Operatingsystems	Windows NT 4.0, UNIX Sun Solaris
Developmenttools	Visual C++ 5.0, Centura SQLWindows 1.5
Databases	ORACLE 8.x, 7.x, SQLBase
Emulations, Tools	Hostlink, Unixlink, Telnet, FTP, SQLTalk, SQLPlus.
Interfaces	BossCube, Xetra.

Developing an Internet-Applet for Credit Scoring

Role: Developer

Branche: Finance and Insurance

References: Co. NSE in Munich. Contact person Mr. F. Nerb.

from	05/98	-	02/99	With	10 months
------	-------	---	-------	------	-----------

Internet Applet and Server for a Bausparkasse.

Client/Server application for usage within WWW.

Customerown objectoriented classlibrary (ROI -> CORBA-subamount).

Middleware and IDL programing

Tests with all Internet-browsers, versions and plattform.

Bauspar-calculatingcore and surfaces

Teamprograming (Sourceadmin).

Databaseadmin, access to ISAM databases.

Develpoing of objectoriented GUI user interfaces.

Printing over DDE interface (Reportdesigner).

Documentation.

Realized with: Operationsystems	Windows NT 4.0
Development tools	Java 1.1 and Visual C++ 5.0
Databases	ISAM Database
Tools, Libraries	ROI, Middelware, Customerown objectoriented Classlibrary, Internet

Developing a database-admin-program

Role: Developer

Branche: Softwarehouse

from	01/98	-	04/98	with	4 months
------	-------	---	-------	------	----------

Spezifikation of the Softwarefeatures.

Support and admintools for Access database.

Developing of GUI user Interfaces.

Database administration over ODBC and RDO.

MS DAO interface with JetEngine.

SQL query language.

Documentation.

Realized with: Operatingsystems	Windows NT 4.0
Developmenttools	Visual Basic 5.0
Databases	Access 7.0
Tools, Libraries	MS-JetEngine, DAO, RDO, ODBC, InstallShield, MSDN

Installation of Network

Role: Developer

Branche: Advertising

References: Co. MPS in Munich. Contact person Mr. Hunsinger.

from	11/97	-	12/97	with	2 months
------	-------	---	-------	------	----------

Planning and installation of a Windows Network (5 PC's).

Connection protocol NetBUI and Ethernet 10 MBit.

Using a Networkhub.

Installation of Internetaccounts.

Realized with: Operationsystems	Windows 95, Windows NT Server 4.0.
Technique	RJ 45 twisted pair wires.

Programing of customer spezific softwaresolutions

Branche: Lasertechnique

References: Co. Baasel in Starnberg. Contact person Mr. Wutz.
